

PROJECT EXERCISE FYS-3610

Objective:

- Go in depth of chosen topic of space physics, which you hopefully find particularly interesting. The topic must be well-defined, and could be regarded as a natural expansion of the course content.
- Write up an article based on information gathered from scientific literature.

Requirements of the report:

- Front page with title and author(s), list of content, introduction, the main part should be subdivided in sections, numbered figures with captions, numbered equations, list of references, and the pages should be numbered.
- The report can be written in Norwegian or English.
- Between 2000-3000 words.
- It's fine that two-and-two work together.

Time line:

- The topic has to be approved by 7 November.
- Submission deadline is 2 December. In addition to a signed paper copy, the report has to be submitted electronically (pdf or ps format) to jmoen@fys.uio.no.

Recommendation:

- Choose topic as soon as possible. Discuss with your teacher.
- It's fine that you collaborate with somebody, but please ensure that you have about the same ambition level, and please avoid a free ride!
