

Antenatal Clinic Ullevål -Optional afternoon clinical practice

Students who attend mandatory antenatal obstetric clinic in Ullevål from 8.45-11.30 are offered to continue in the afternoon (12.30-15.00). The head midwife of the antenatal clinic will meet you in the waiting hall at 12.15 and show you where to go. The options are:

1. Continue with the same doctor in the antenatal clinic
(Given that the doctor in question offers you to stay)
2. Postnatal outpatient clinic
 - midwife who serves/helps postnatal women with different problems (e.g. breastfeeding problems, pain relating to sutures)
3. Routine antenatal ultrasound, gestational week 18-20,
 - join a skilled ultrasound midwife in a thorough review of the fetus and the placenta
4. Fetal medicine
 - Highly qualified ultrasound consultants who see antenatal patients with fetuses with severe growth restriction, malformations ia.
