UiO : Universitetet i Oslo

dScience

dScience

Digital resources

Computational science

is about development of methods and algorithms to solve and understand complex phenomena and problems.

Data science

is about development of methods, algorithms and systems to organize, refine and extract knowledge from data.

dScience

Value creation
Decision making
Scientific discoveries

Insight
through analysis and visualization

Methods and algorithms

Structures and systems

Information
captured in suitable environments

Understanding data

Representing knowledge

Data
from a huge variety of sources

dScience activites

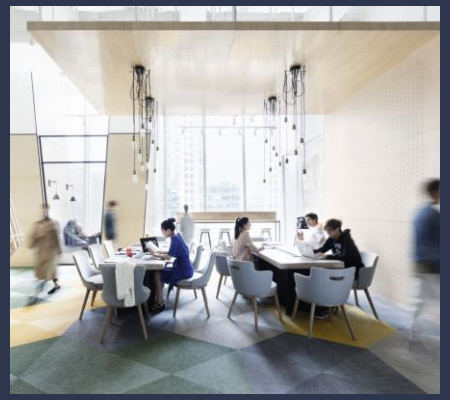
Community Services

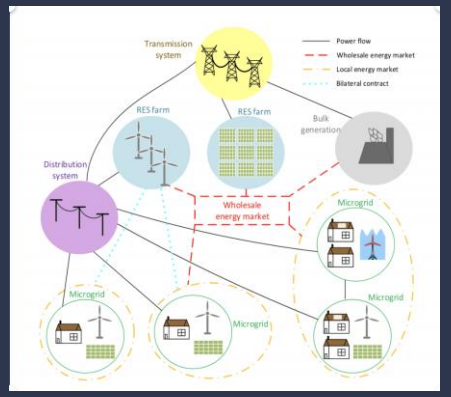
Digital Resources

Research Projects

Artificial Intelligence/Machine Learning

Digital Twins/Knowledge Representaion

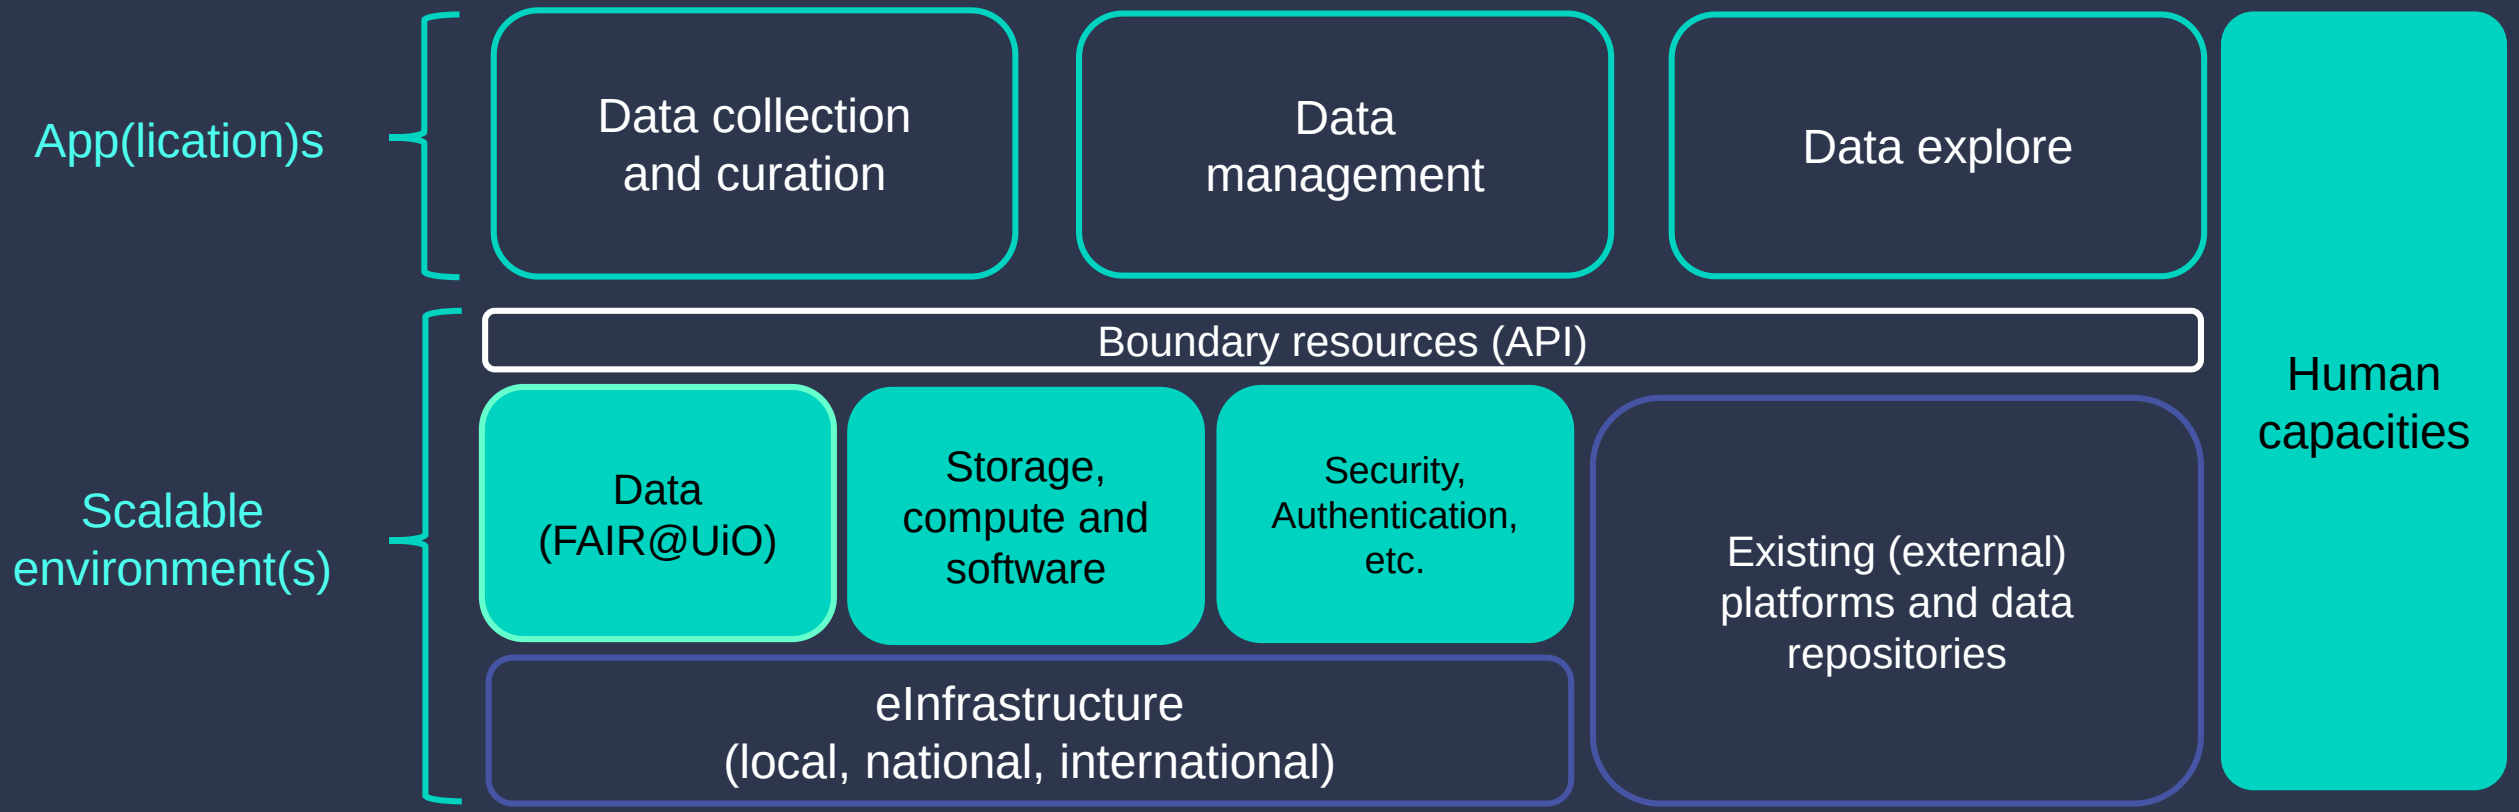




Digital resources – seminars 2021

Today	Digital resources at dScience (local resources)
August	National and international resources
September	Legal issues, including privacy (GDPR)
October	FAIR data at UiO

Digital resources



We want feedback!
