

We would like to promote a graduate position within Project Development - Mapping & Survey - Geomatics and data management. Typical tasks within the mapping department:

- Geographical databases ESRI and Oracle including Equinor's infrastructure data
- Project support within business development, project development and operations
- Engineering and geomatics support to renewable projects within wind and solar
- Engineering and geomatics support to oil and gas related projects
- Geographical information tools like ESRI ArcGIS platform (Desktop, Pro, Portal etc.), Navimodel, Microstation, Autodesk, FME etc.
- Geodesy
- Programming, e.g. using Python together with ESRI toolbox, but also Matlab
- Satellite mapping, data collection from aircrafts and UAS
- Analysis of data from seabed mapping by means of offshore vessels and ROVs
- Safety, security and sustainability support
- Marine operations
