

UNIVERSITY
OF OSLO

To the Deans of the University of Oslo,

dScience Support for Researchers at the University of Oslo

dScience - Centre for Computational and Data Science, in close collaboration with the IT department, is providing research-oriented data and computational science support to researchers at the University of Oslo. The overall aim is to empower the research community with essential knowledge, technologies, and practical expertise that contribute to accelerated advancements in the fields of data science and computational science.

The support is provided by a team of data scientists associated with the Data Science Analytics Group at dScience and IT-department. The contribution can take various forms, including single-session consultations for targeted issues, as well as more intensive involvement in your analysis workflows. The level of assistance we can provide will depend on available funding and our capacity, but we encourage all researchers to apply, regardless of their project's funding status.

The Application Deadline is May 30th, 2025.

To apply for the support visit uio.no/dscience/english/data-resources/dscience-support-call/

We invite you to learn more about:

- dScience: uio.no/dscience/english/
- Data Science Analytics Group: uio.no/dscience/english/data-resources/
- IT-department: usit.uio.no/english/about/organisation/rde/

We look forward to collaborating with you and contributing to your research success. If you have any questions or need further information, please feel free to reach out to:

- Arash Ahmadi at the dScience: arash.ahmadi@dscience.uio.no or
- Anne Schad Bergsaker at the IT-department a.s.bergsaker@usit.uio.no

Best regards,

Morten Dæhlen
Centre Leader
