

ABOUT PARTNERFORUM - 2019

Partnerforum (PF) is a collaboration between University of Oslo (UiO), the Norwegian School of Management (BI) and the central Norwegian state administrations. Today, we are 21 partners, including nine Norwegian ministries.

PF creates a meeting place for knowledge development, sharing experiences and a network for partners. We generate arenas for introducing, distributing and exchanging new research and work experiences between sectors that are relevant for government officials. We endeavor to stimulate new research that can involve the challenges of different government areas, and to create collaborations between university scholars and partners. We also want to be part of further progress of government sectors for all our partners.

Our annual fee is 119.000 NOK, which gives free admission to all arrangements. PF manages seminars of current interest, seminars for top leaders, breakfast meetings and conferences. We have also different types of networks that have become very popular among our partners. The partners also participate in a special seminar prepared specifically for them, where they decide, with the help of PFs secretary, the theme, speakers, and target group in the organisation.

PF has a vision of expanding with further partners, and would like more members from the Norwegian state administration. Our activities and arrangements are mostly in Norwegian.
