

1 Weekly main assignment for week 7 AST3220

Mandatory hand-in-assignment

Your solution of the mid term exam set given in AST4220 october 2006. The important point of this assignment is for you to gauge your knowledge before the mid term exam. Therefore we strongly recommend that you compile your own independent solution rather than copy an exam solution from the web or the solution of another student. Pretty much any attempt at a solution handed in on time will be accepted.

The assignment can be handed in either electronically by email to `marit.sandstad@astro.uio.no`, by handing in in class or by leaving your solution in Marit's postal shelf on the ground floor of the astrophysics building (shelf marked SANDSTAD). Either way you choose, the assignment should be handed in by 14:30 on the 8th of March.

Prepare or at least look at before class (will be done on the board in class)

Mid term exam in AST3220 given in March 2012.
