Exercise 6, fall 2004

Choose one tutorial from
Coventor > Coventorware 2004 > Documentation > Analyzer Tutorials
(not tutorial 5 links and ties)
or
Coventor > Coventorware 2004 > Documentation > Analyzer Supplemental Analysis

Go through the tutorial
Change one or more parameters from the tutorial and observe the changed results. Discuss the results with respect to theory and, if possible, analytical calculations from the course.

Create between 6 and 10 slides explaining your work. The slides can be powerpoint or pdf. Week 49 the pair will present a 15 minute talk explaining the exercise. On the final exam, each candidate will present the talk separately.
