Agenda

- Grunnleggende java
- Klasser og filer
- Beholdere (lenkelister)
- Rekursjon(?)
- Tråder
- Litt tips

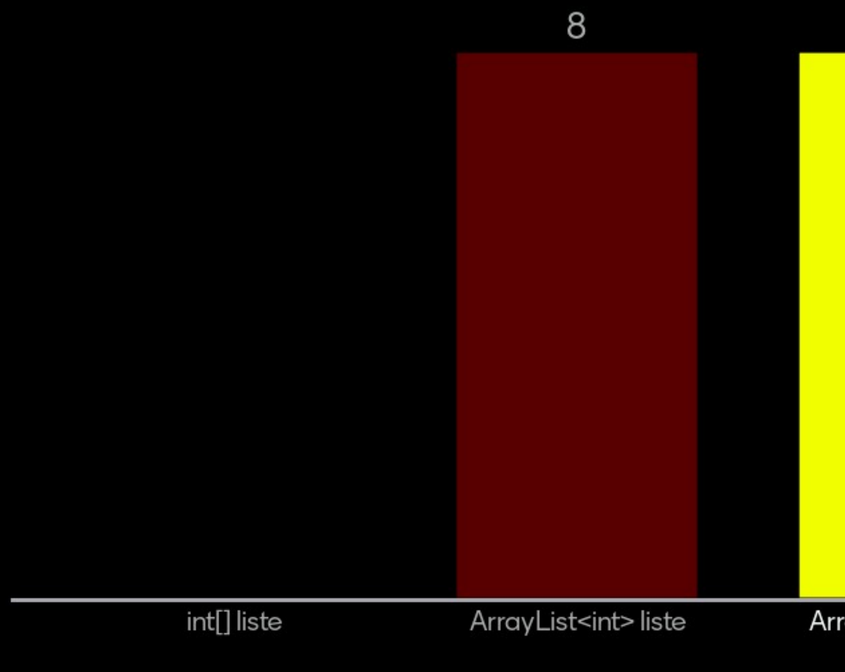

1

Bruker dette hvis noe kun skal være synlig for klassen jeg er i nå:

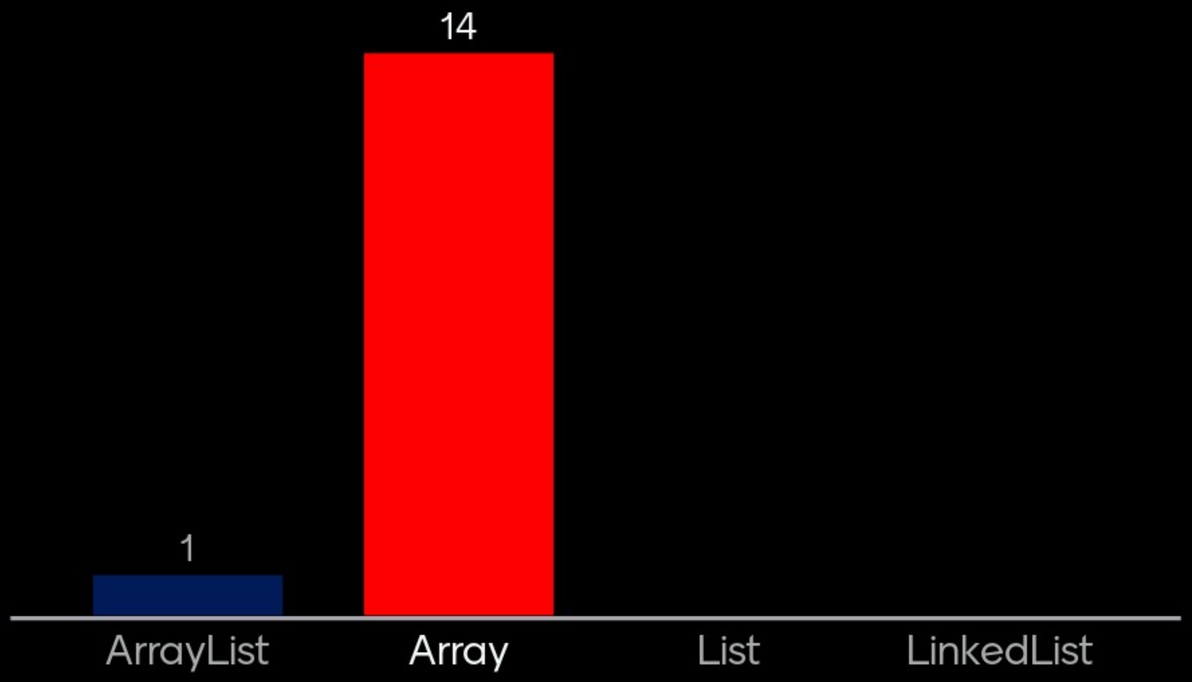

3
16

Hvis jeg skal ha en dynamisk liste bruker jeg

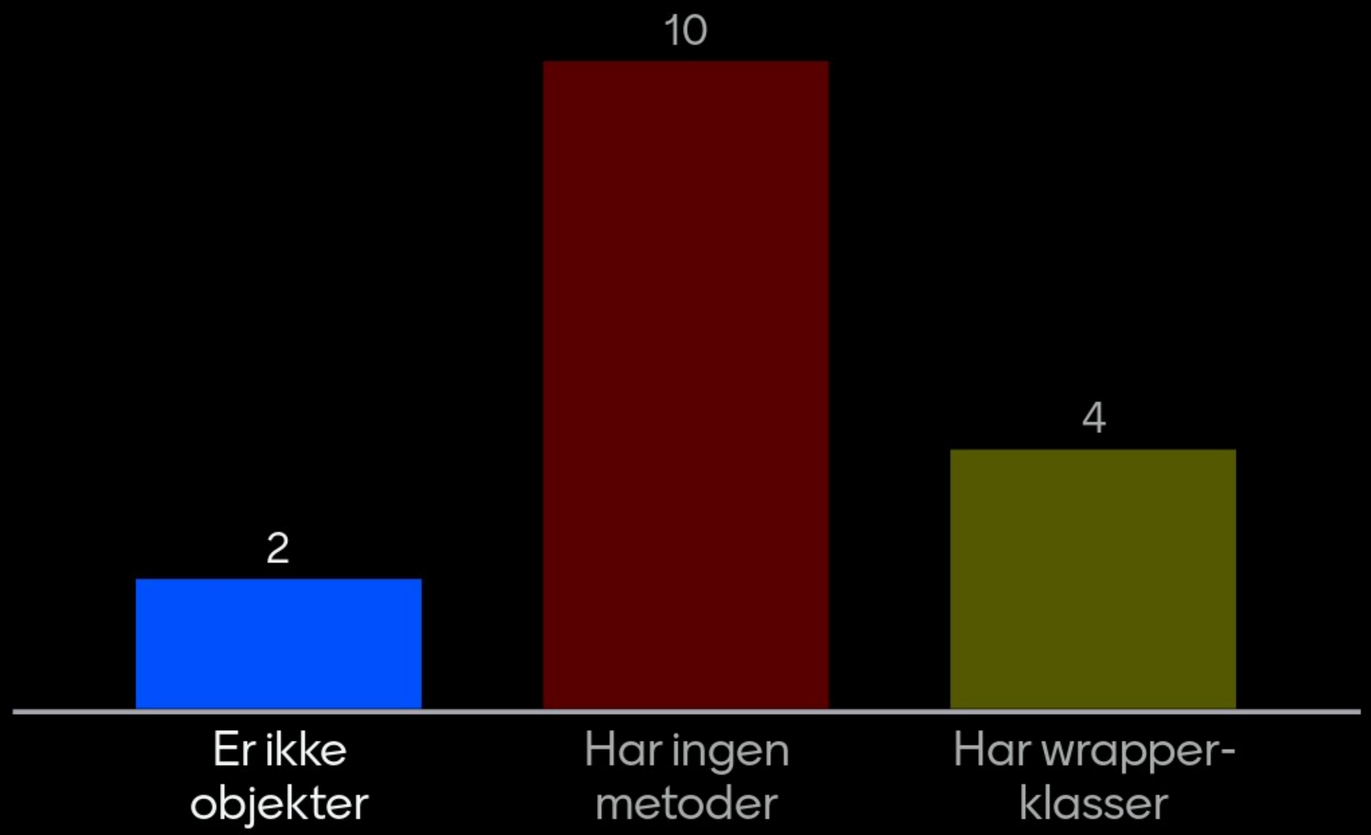

1
16

Jeg skal holde på 8 verdier i en beholder, det mest effektive er å bruke:

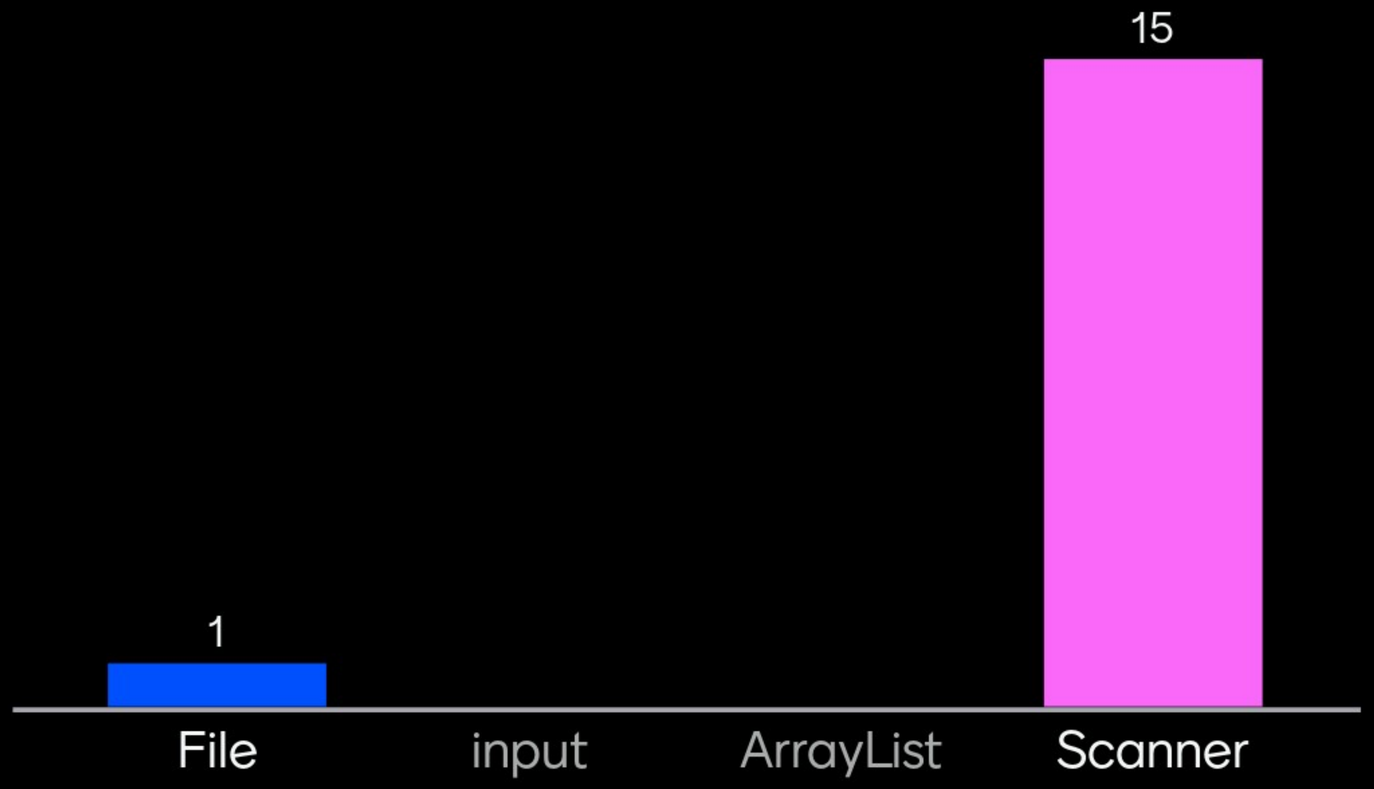

15

Velg feil påstand om primitive typer i java

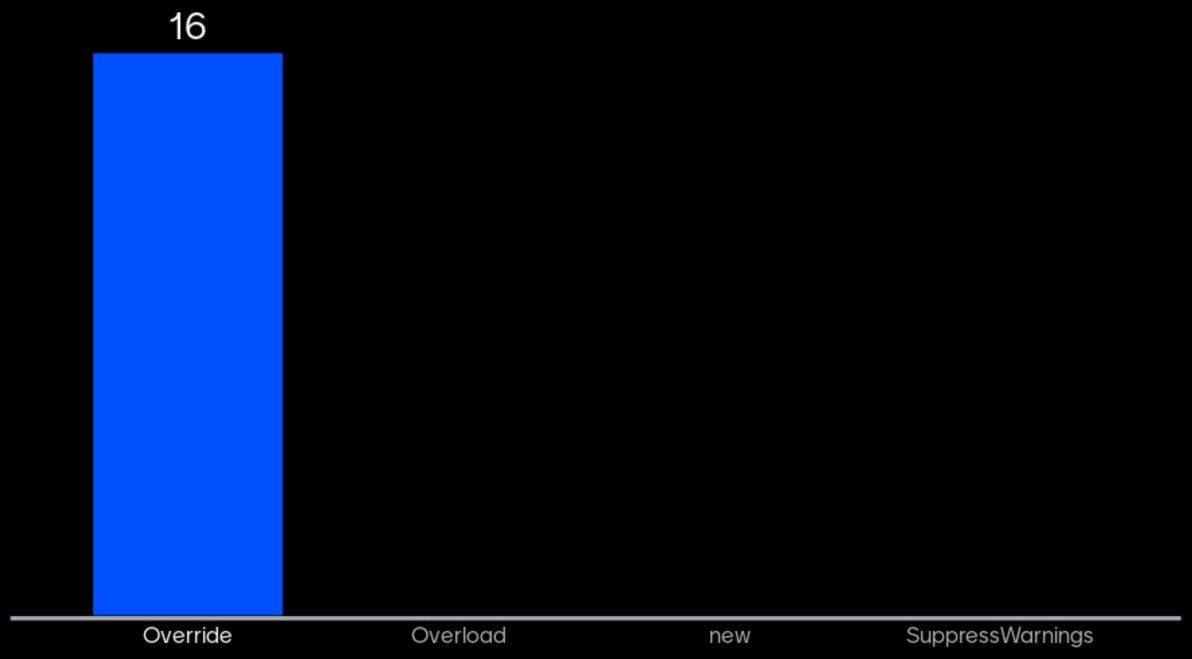

1
16

For å lese en fil trenger jeg

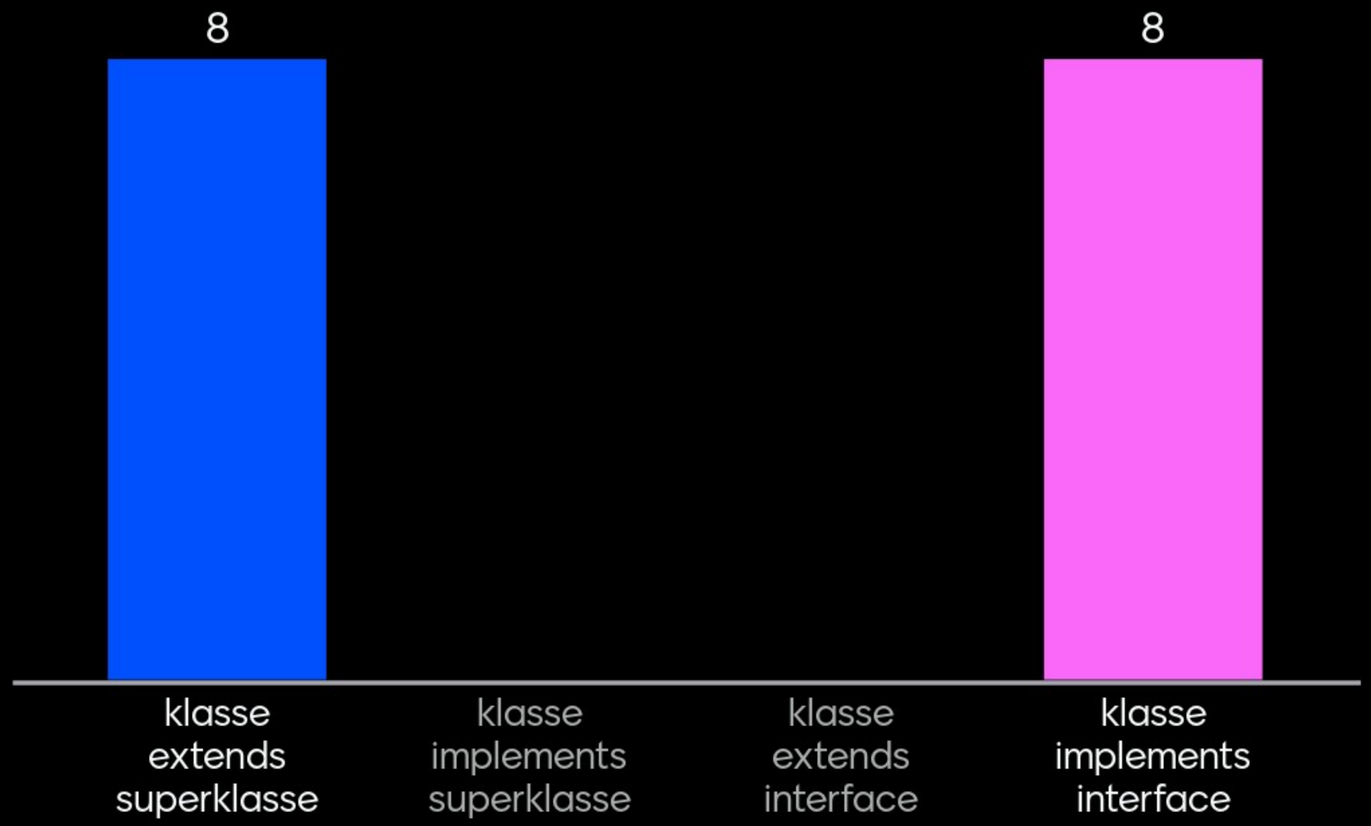

For å redefinere eksisterende metoder fra en super-klasse bruker jeg

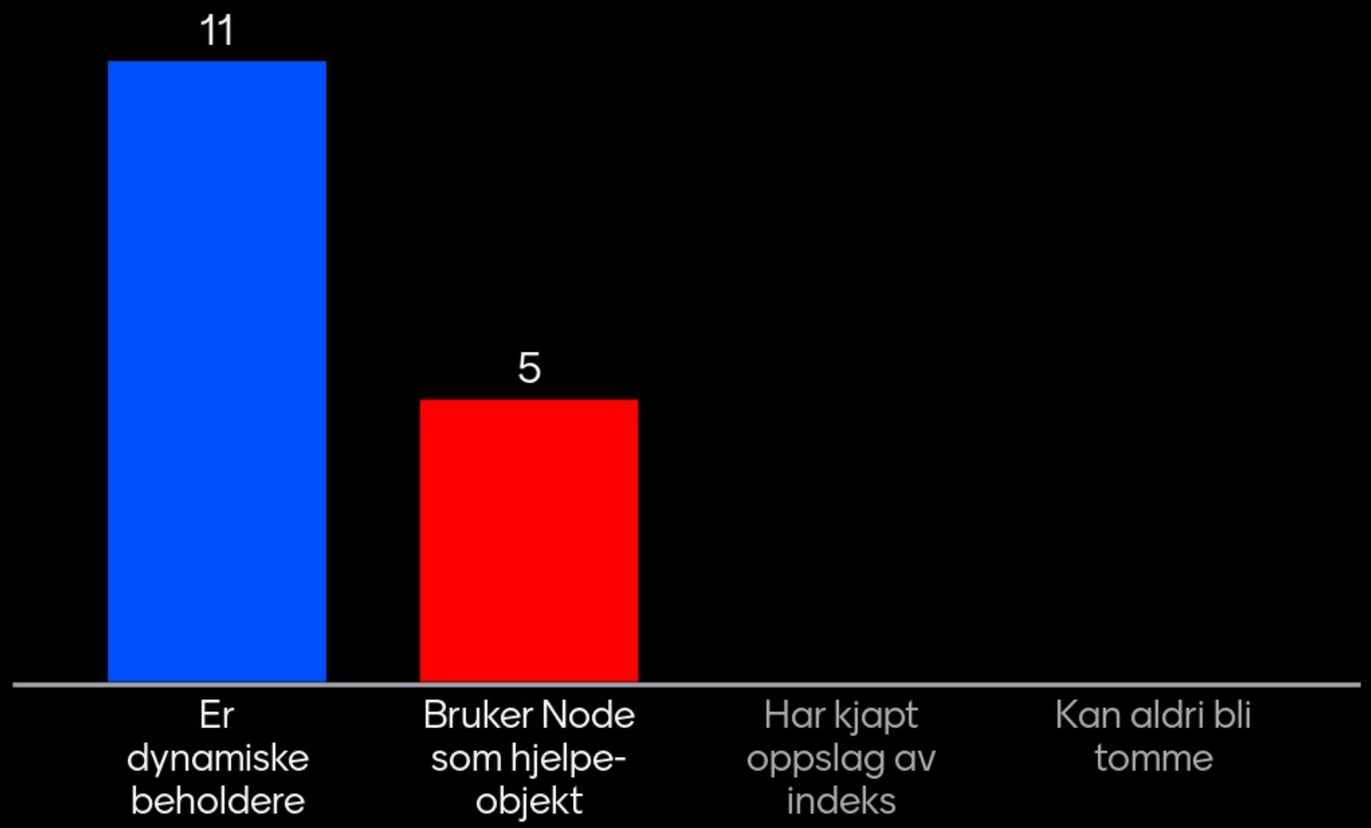

16

Hva stemmer om arv og grensesnitt?

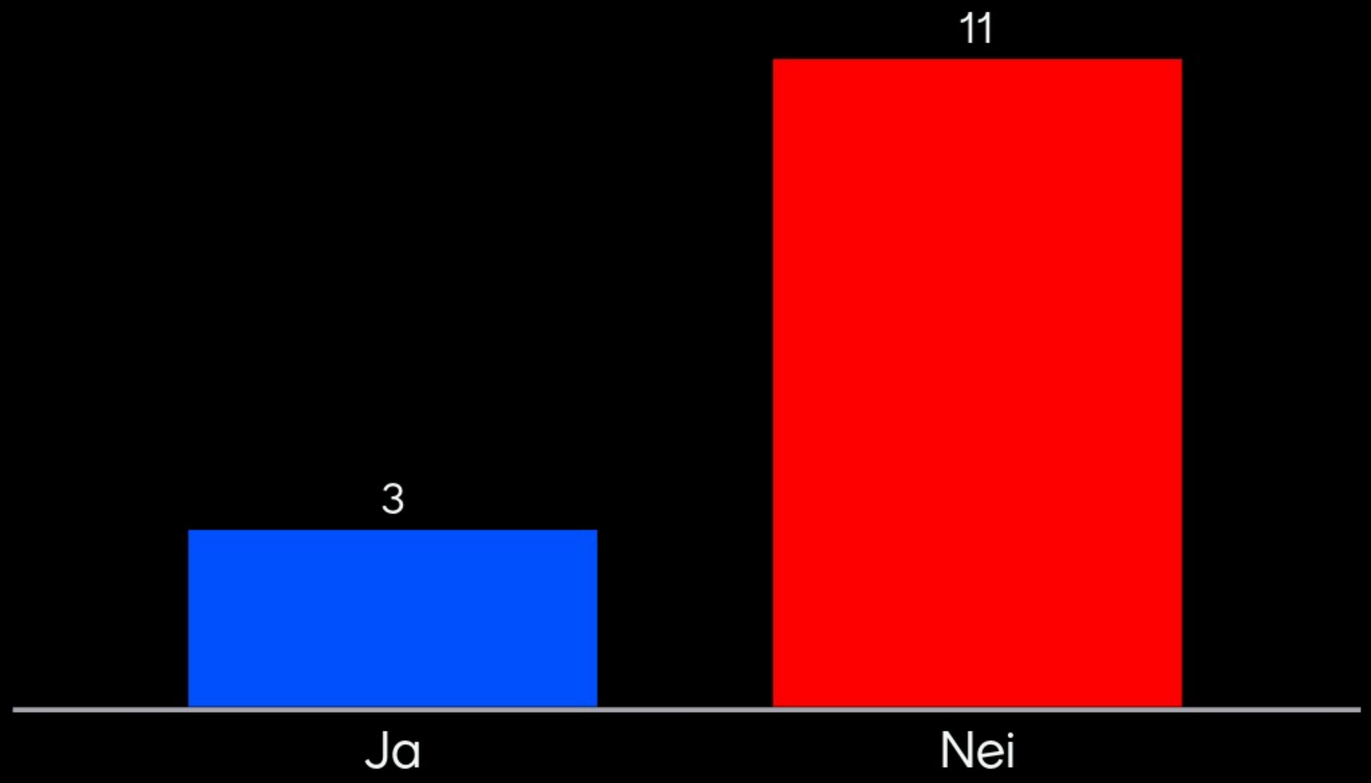

16

Lenkelister...

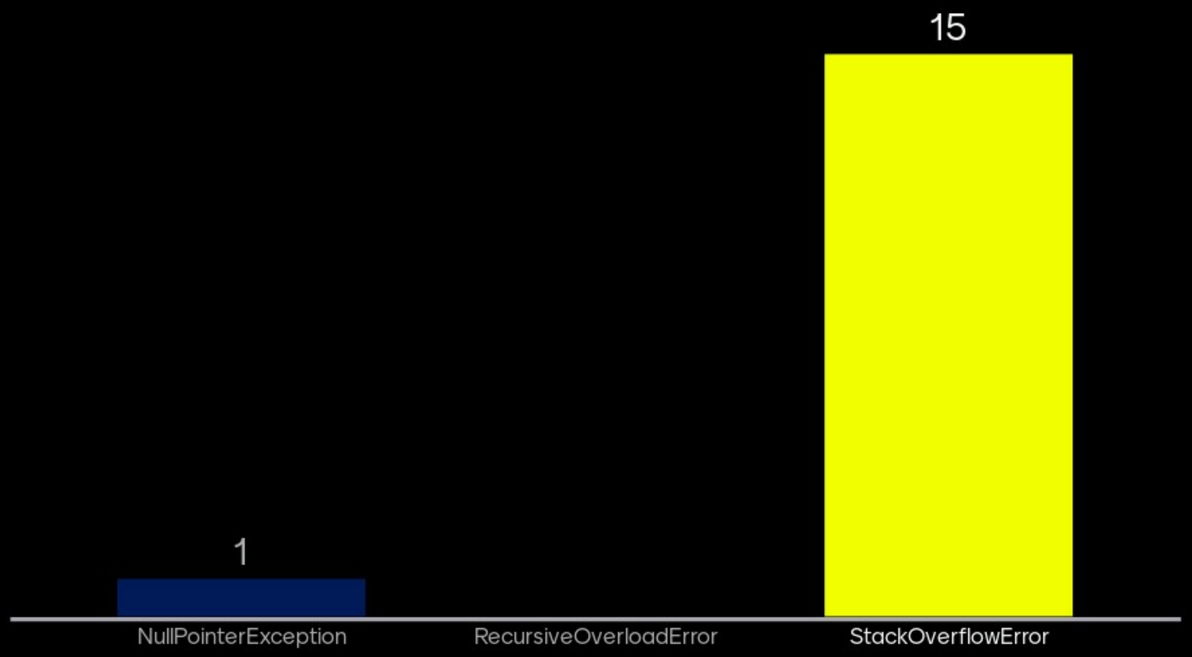

Livekode lenkeliste?

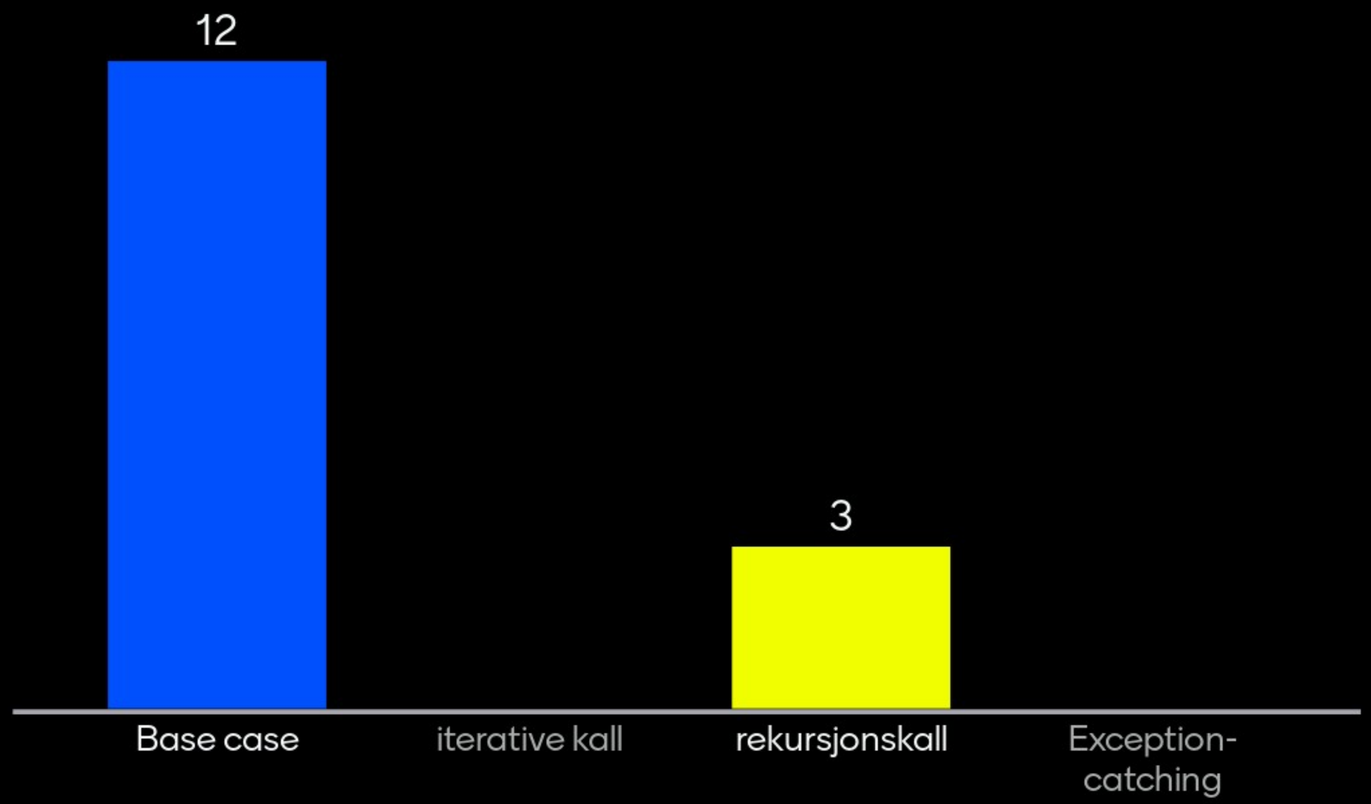

14

Hvilken feilmelding får du om rekursjon kjører evig?

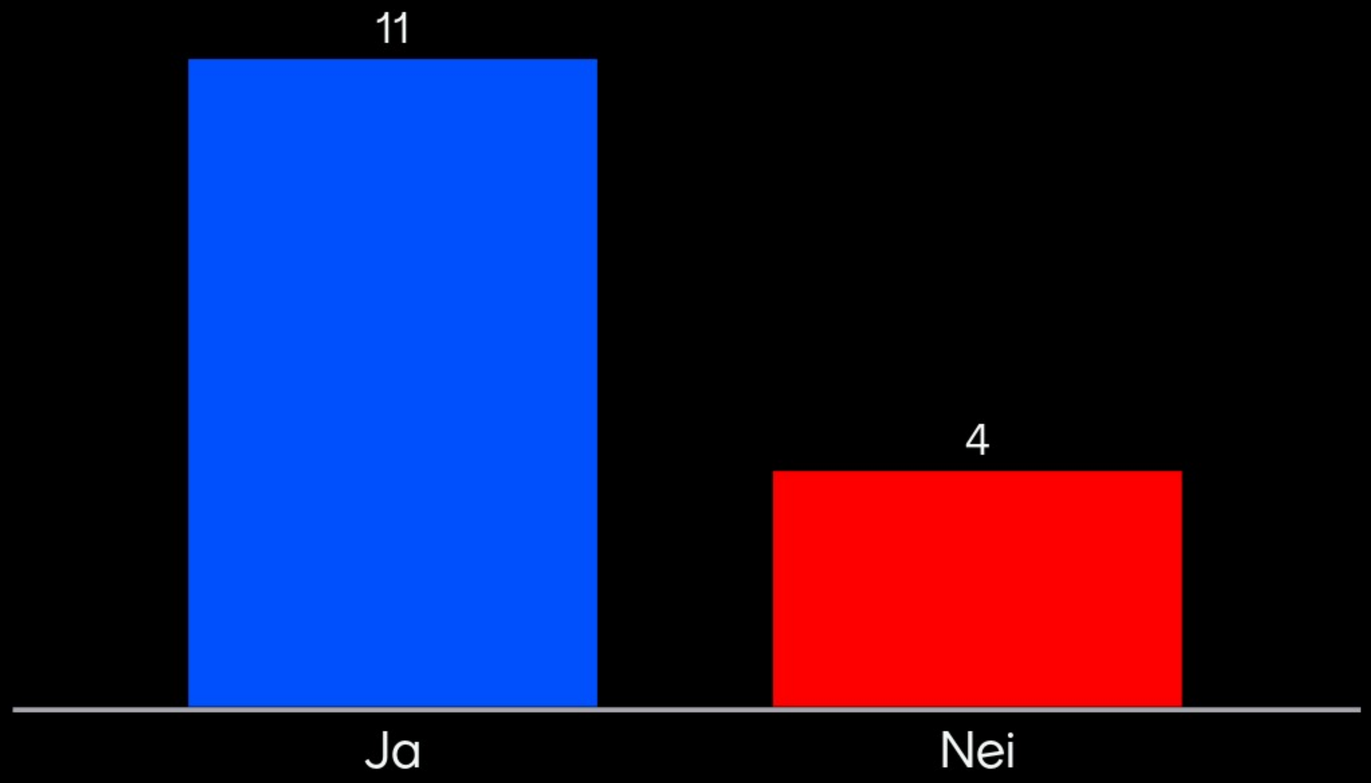

1
16

Hva må en rekursjon bestå av?

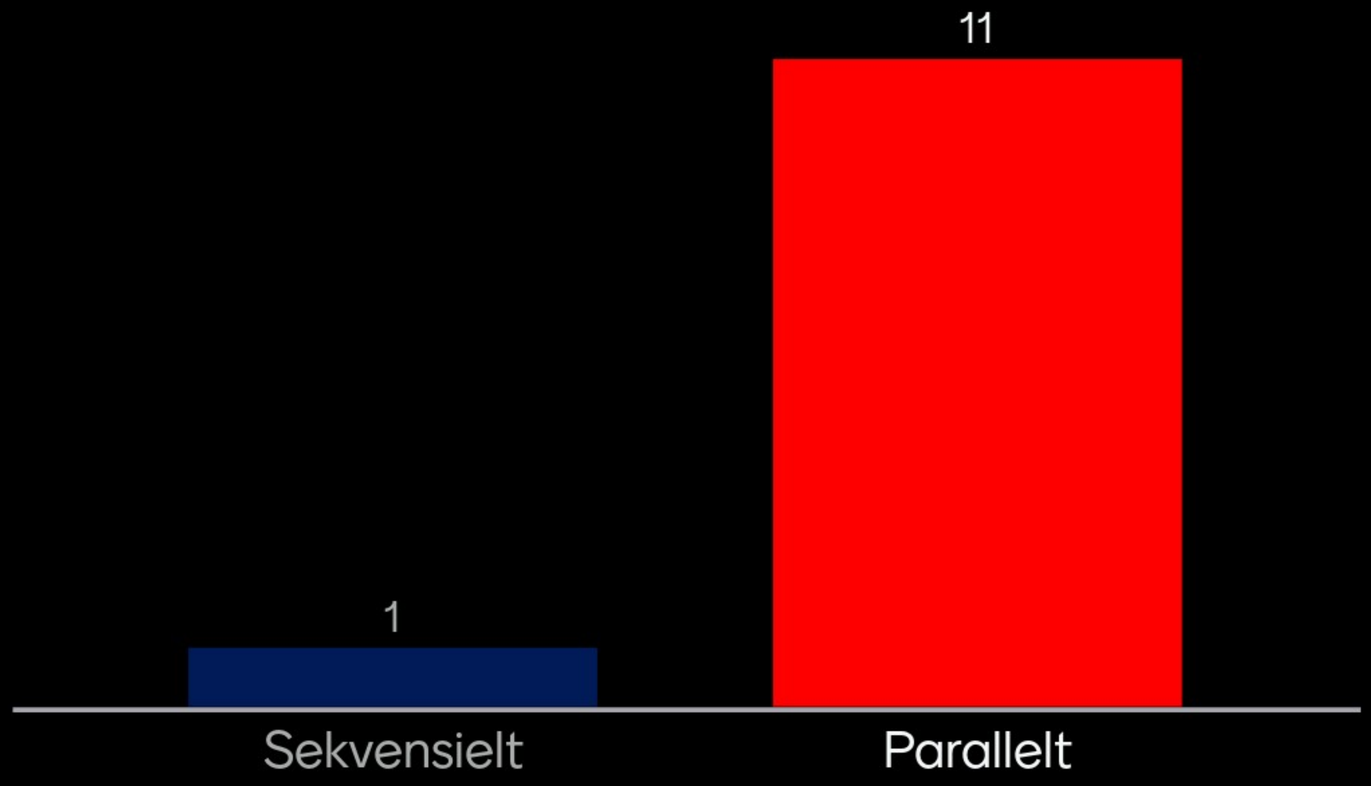

Skal jeg gå gjennom rekursjon?

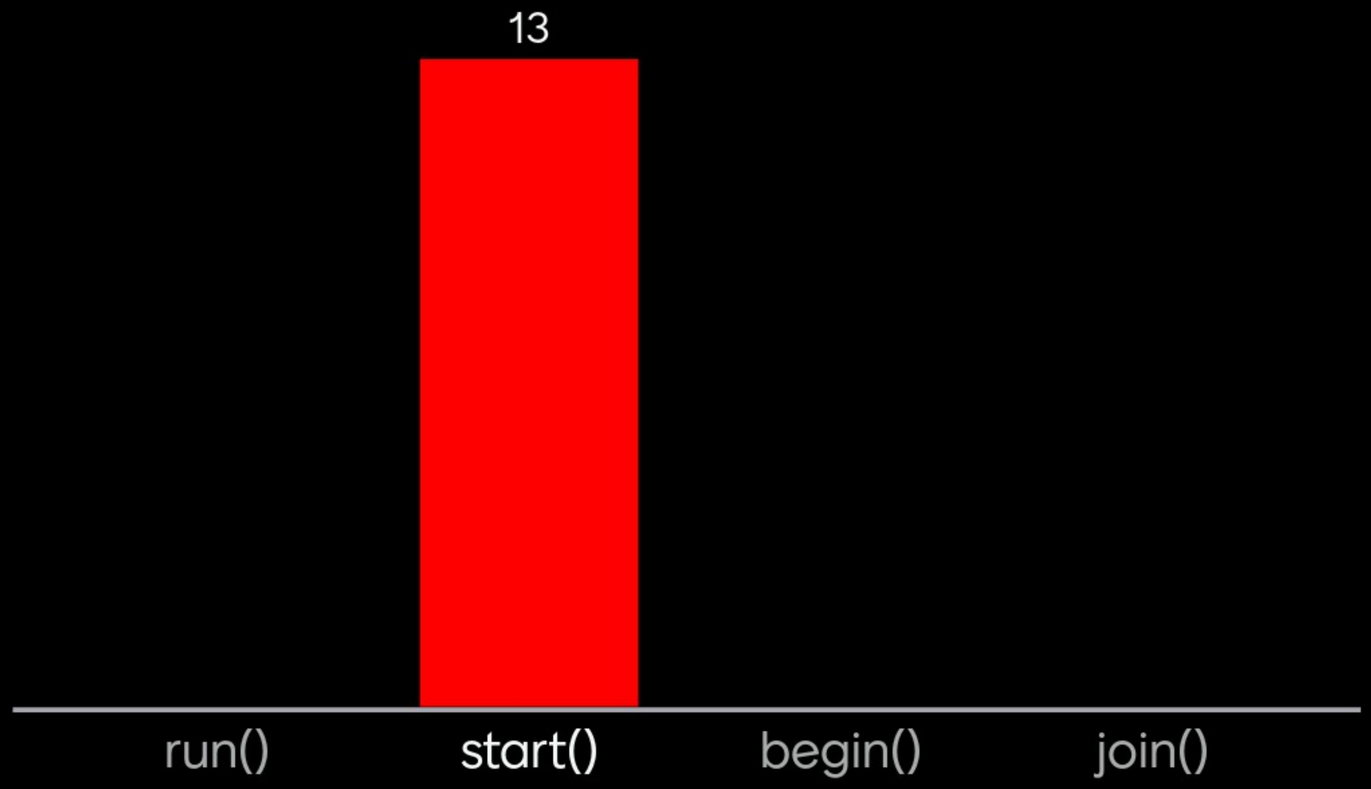

1
15

Tråder gjør at vi kan kjøre kode

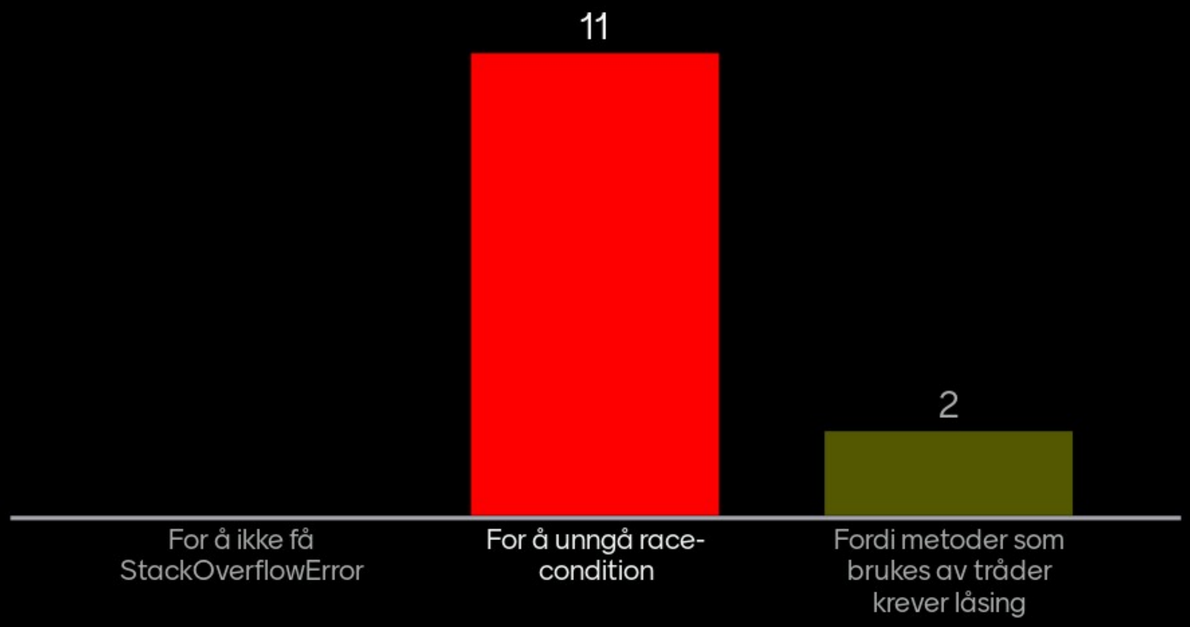

1 12

En tråd starter opp ved å kjøre

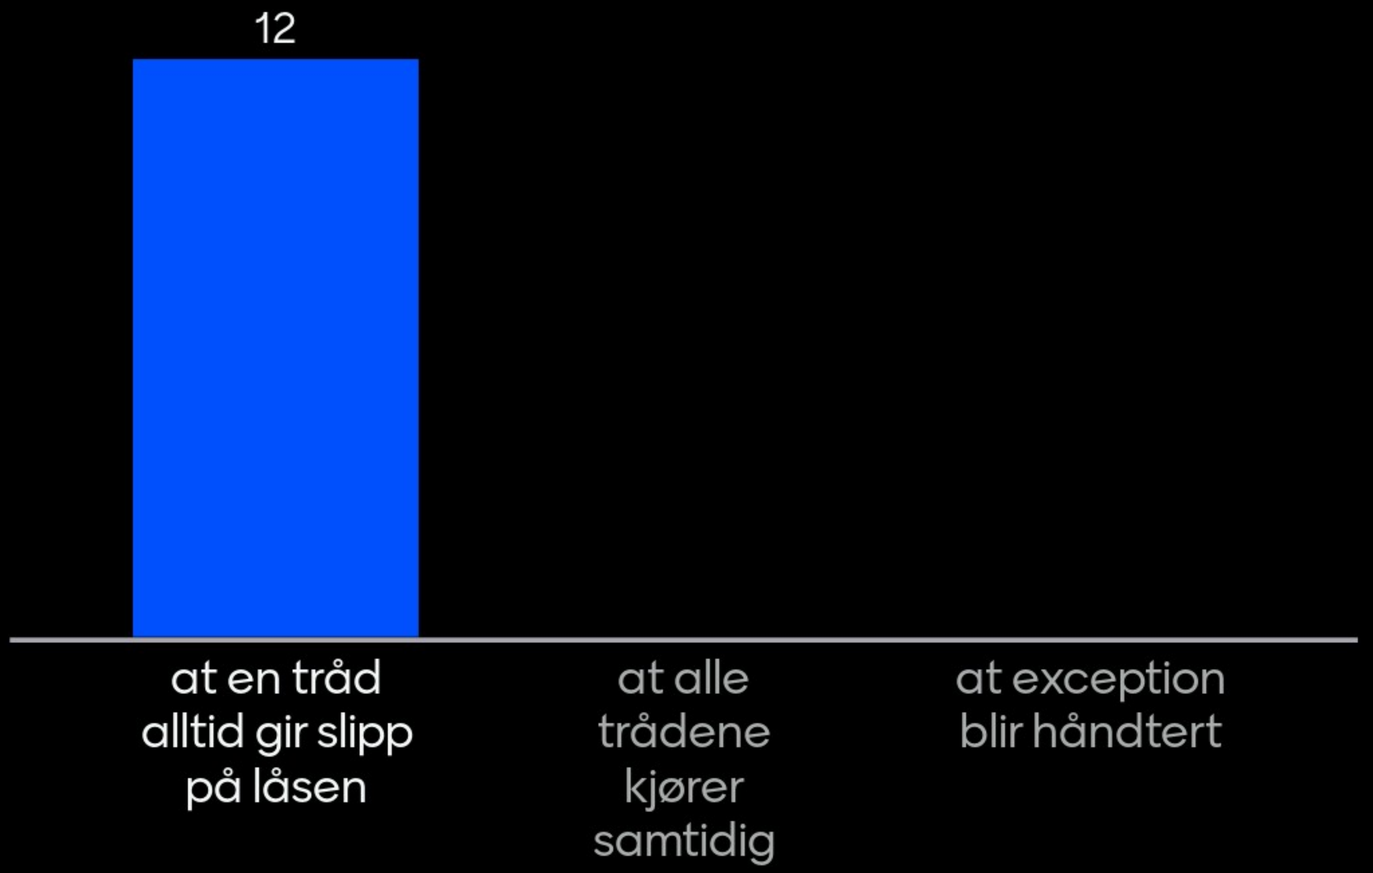

Hvorfor må noen metoder som tråder bruker puttes i kritiske regioner (låser)?

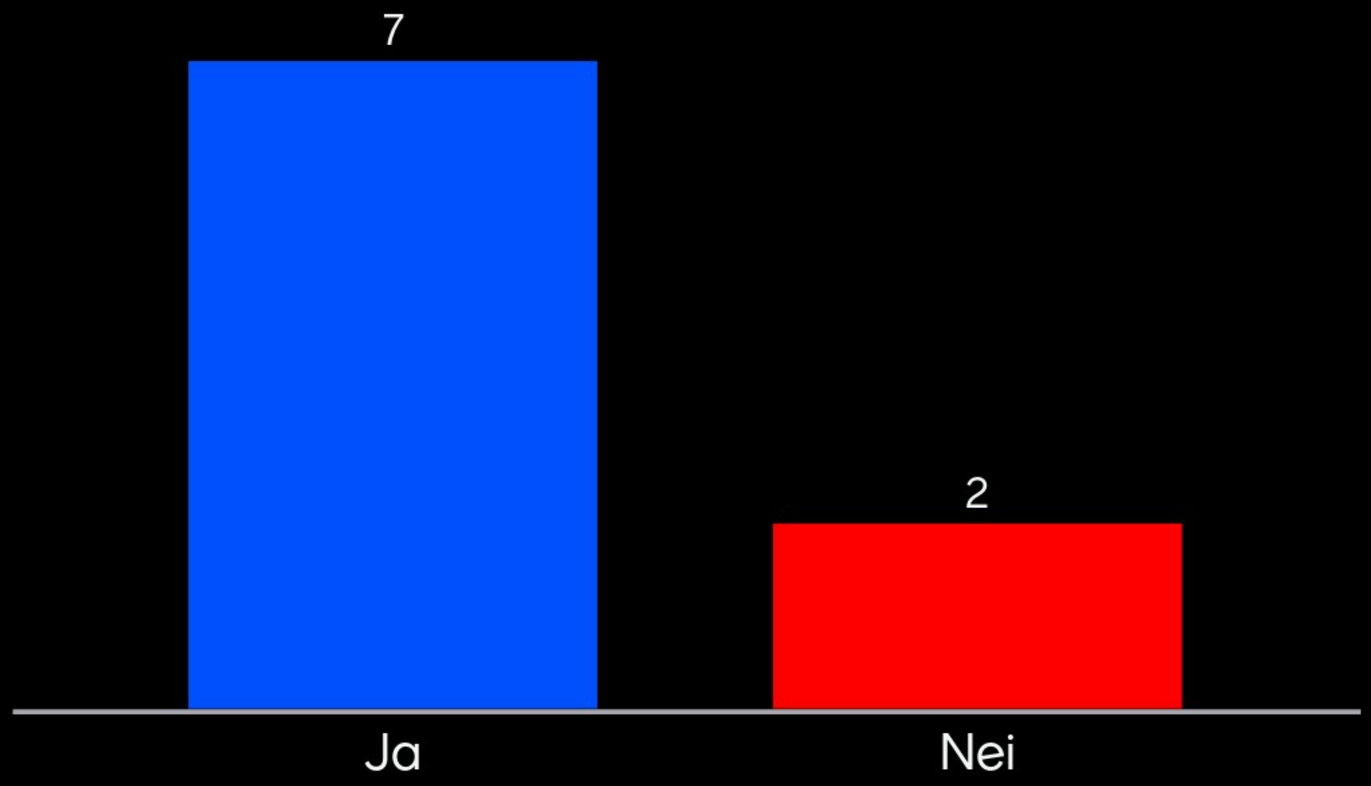

1
13

Finally sørger for

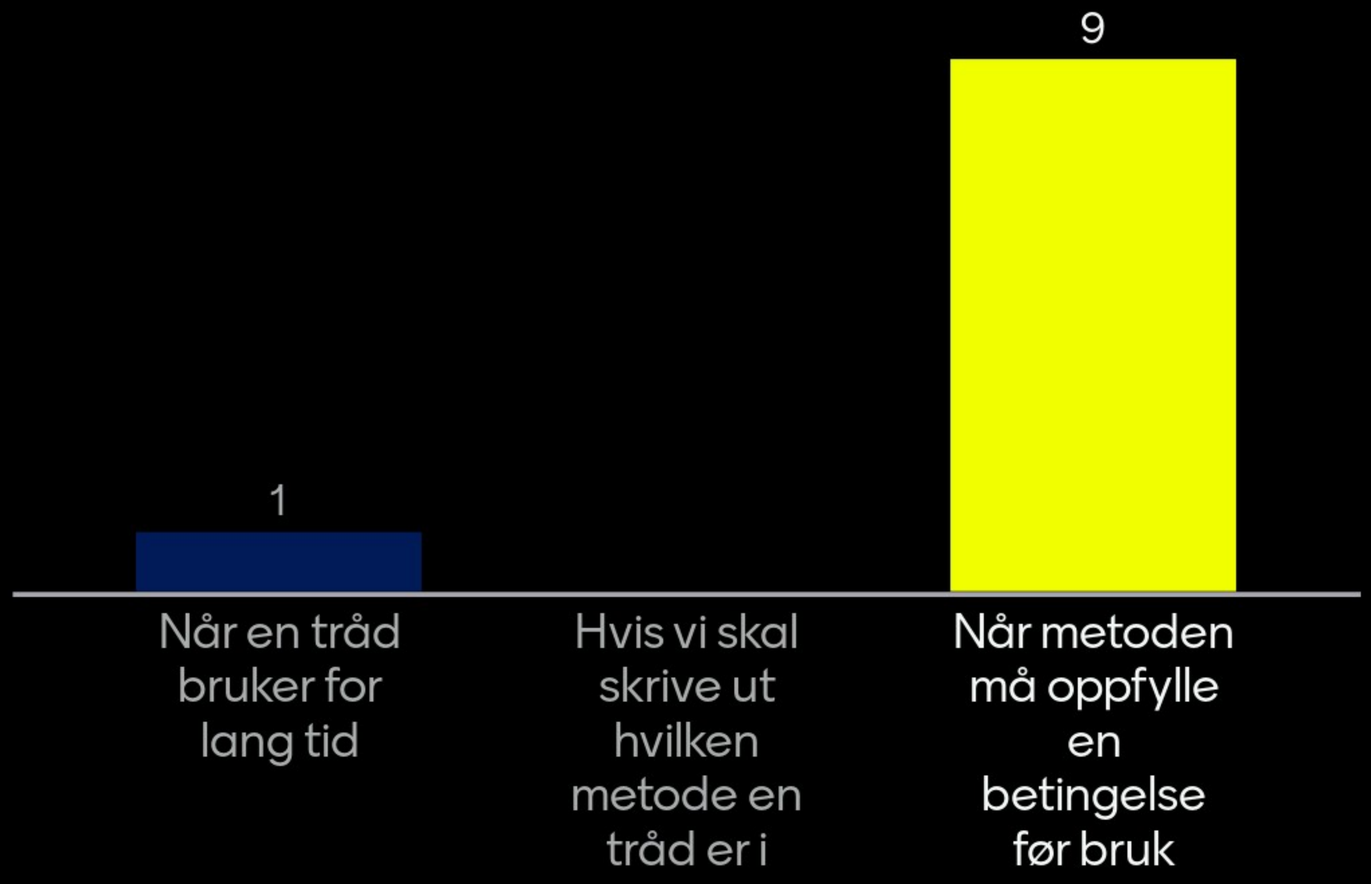

12

Skal jeg gå gjennom et tråd-eksempel?

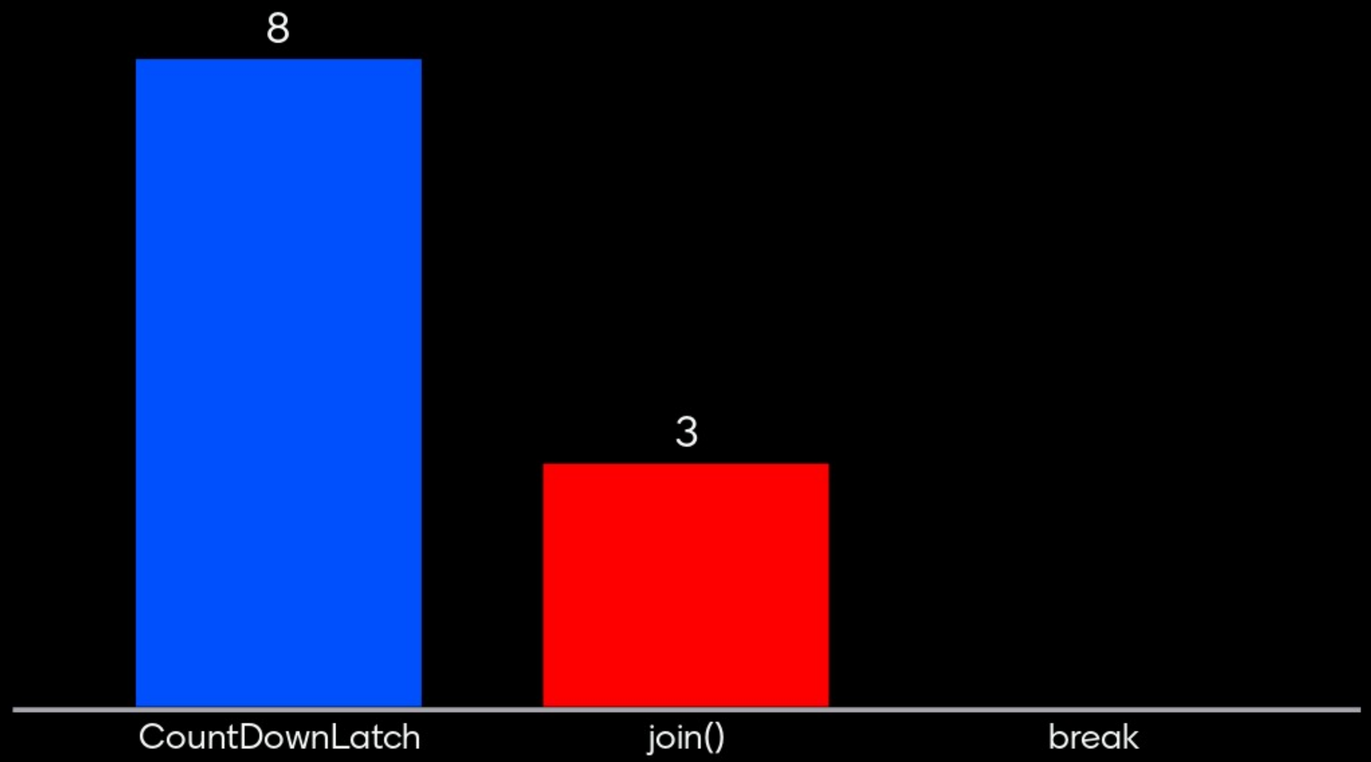

9

Når brukes Conditions med tråder?

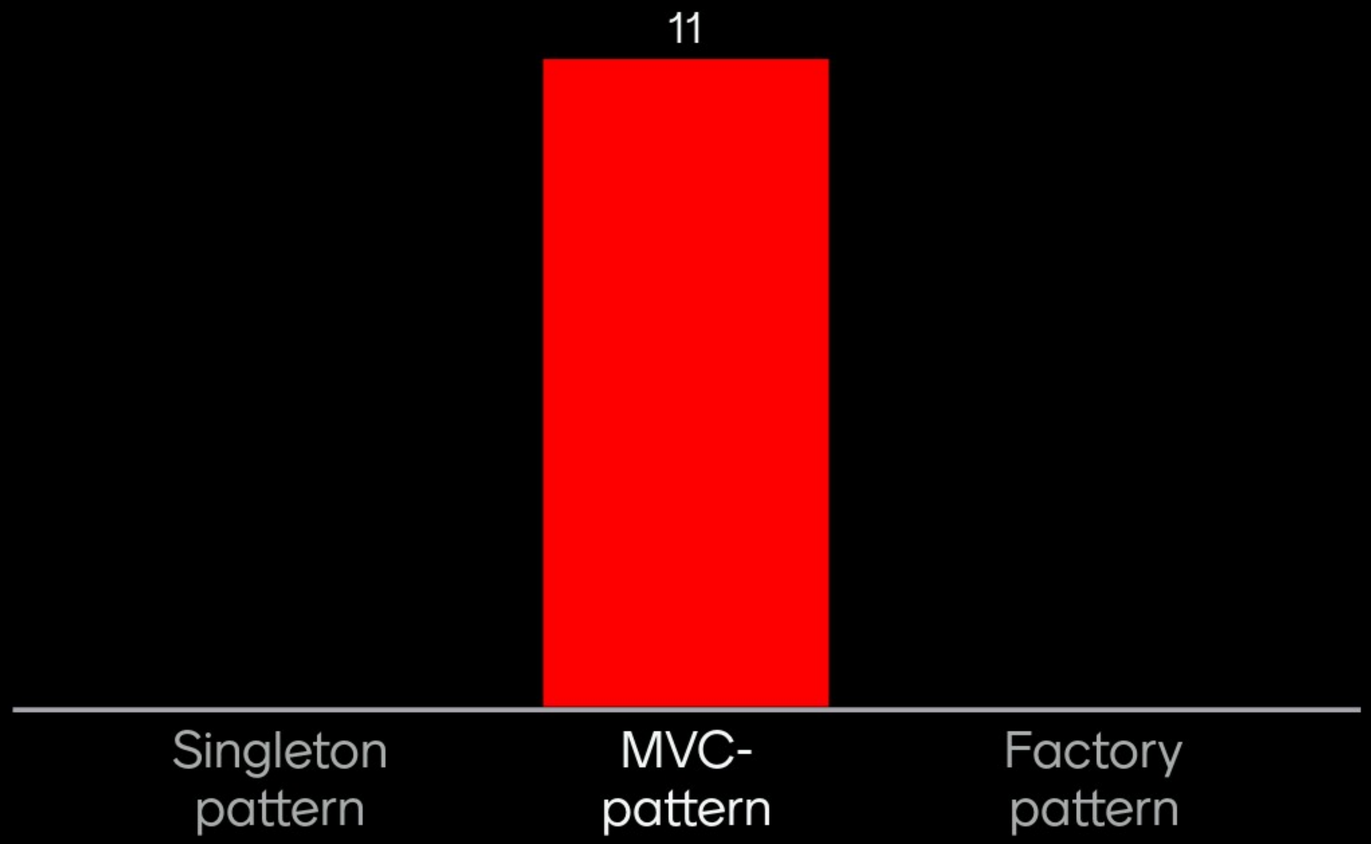

10

Dette er en barriere

Hva slags designmønster er dette?

Tips for eksamensøving

- Skru av alle hjelpemidler i VS Code
- Ikke test koden underveis
- Gjør tidligere eksamenssett
- Tegn hvis du står fast
- Ikke spør ChatGPT -> bruk Oracle i stedet
- Ikke print ut 200 sider med hjelpemidler
- final variabler er ALL CAPS
- Lag en sjekkliste til bruk før levering
