- File → Preferences → Settings
- Øverst i høyre hjørne – trykk på:

- Legg til følgende i filen (inne i klammene, husk at hver setting – unntatt den siste – må ha komma etter seg):

```
    "workbench.startupEditor": "none",
    "workbench.activityBar.visible": false,
    "workbench.statusBar.visible": false,
    "editor.quickSuggestions": {
        "other": "off",
        "comments": "off",
        "strings": "off"
    },
    "editor.acceptSuggestionOnCommitCharacter": false,
    "editor.acceptSuggestionOnEnter": "off",
    "editor.suggestOnTriggerCharacters": false,
    "editor.parameterHints.enabled": false,
    "editor.wordBasedSuggestions": false,
    "editor.autoClosingBrackets": "never",
    "editor.inlayHints.enabled": "off",
    "editor.minimap.autohide": true
```

- Lagre (Crtl+S) og start VSCode på nytt
