1. I VS Code, åpne settings ved å trykke:
   Windows / Linux: **Ctrl** + ,
   macOS: **Cmd** + ,

2. Øverst i høyre hjørne – trykk på:

3. Legg til følgende i filen (inne i klammene, husk at hver setting – unntatt den siste – må ha komma etter seg):

```
"workbench.startupEditor": "none",
"workbench.activityBar.location": "default",
"workbench.statusBar.visible": false,
"editor.quickSuggestions": {
    "comments": "off",
    "strings": "off",
    "other": "off"
},
"editor.acceptSuggestionOnCommitCharacter": false,
"editor.acceptSuggestionOnEnter": "off",
"editor.suggestOnTriggerCharacters": false,
"editor.parameterHints.enabled": false,
"editor.wordBasedSuggestions": "off",
"editor.autoClosingBrackets": "never",
"editor.inlayHints.enabled": "off",
"editor.minimap.enabled": false,
"chat.disableAIFeatures": true,
"editor.codeLens": false,
```

4. Lagre filen.
