

# H V A S S

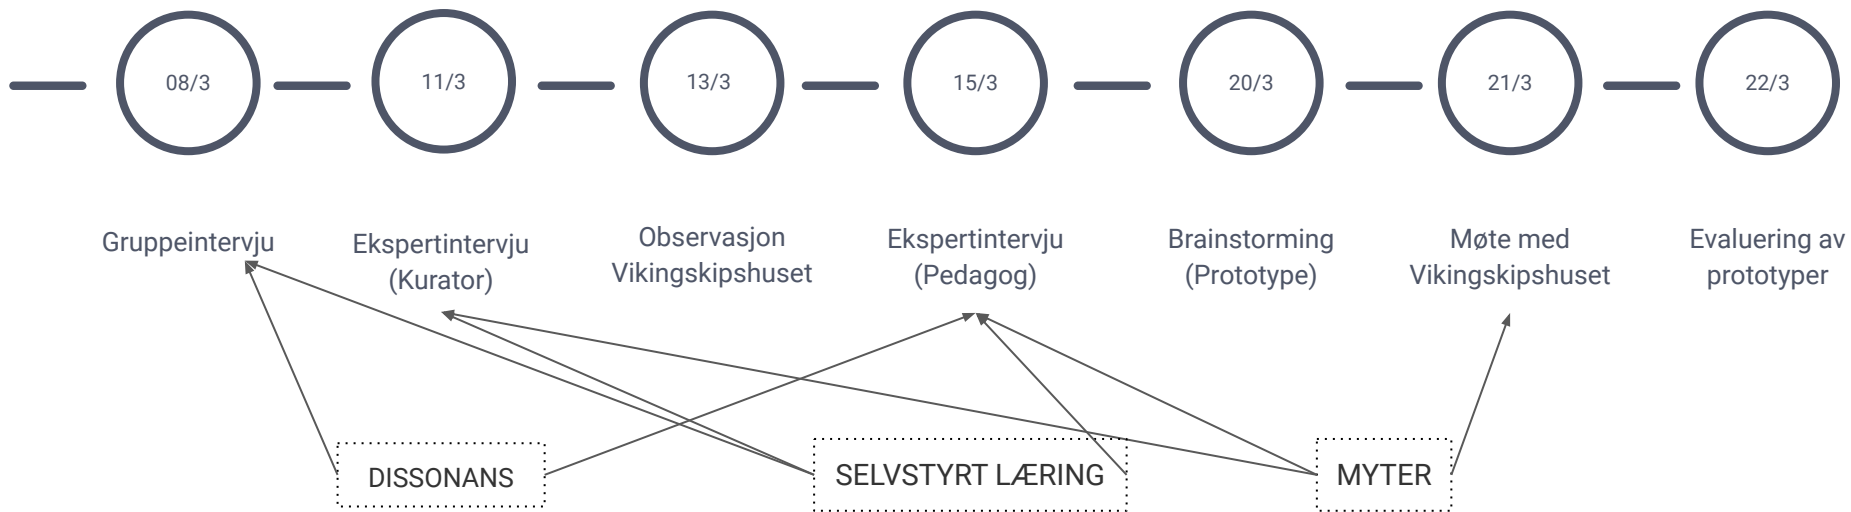

Hvordan bruke nysgjerrighet som læringsverktøy  
og til formidling på *Vikingskiphuset*.

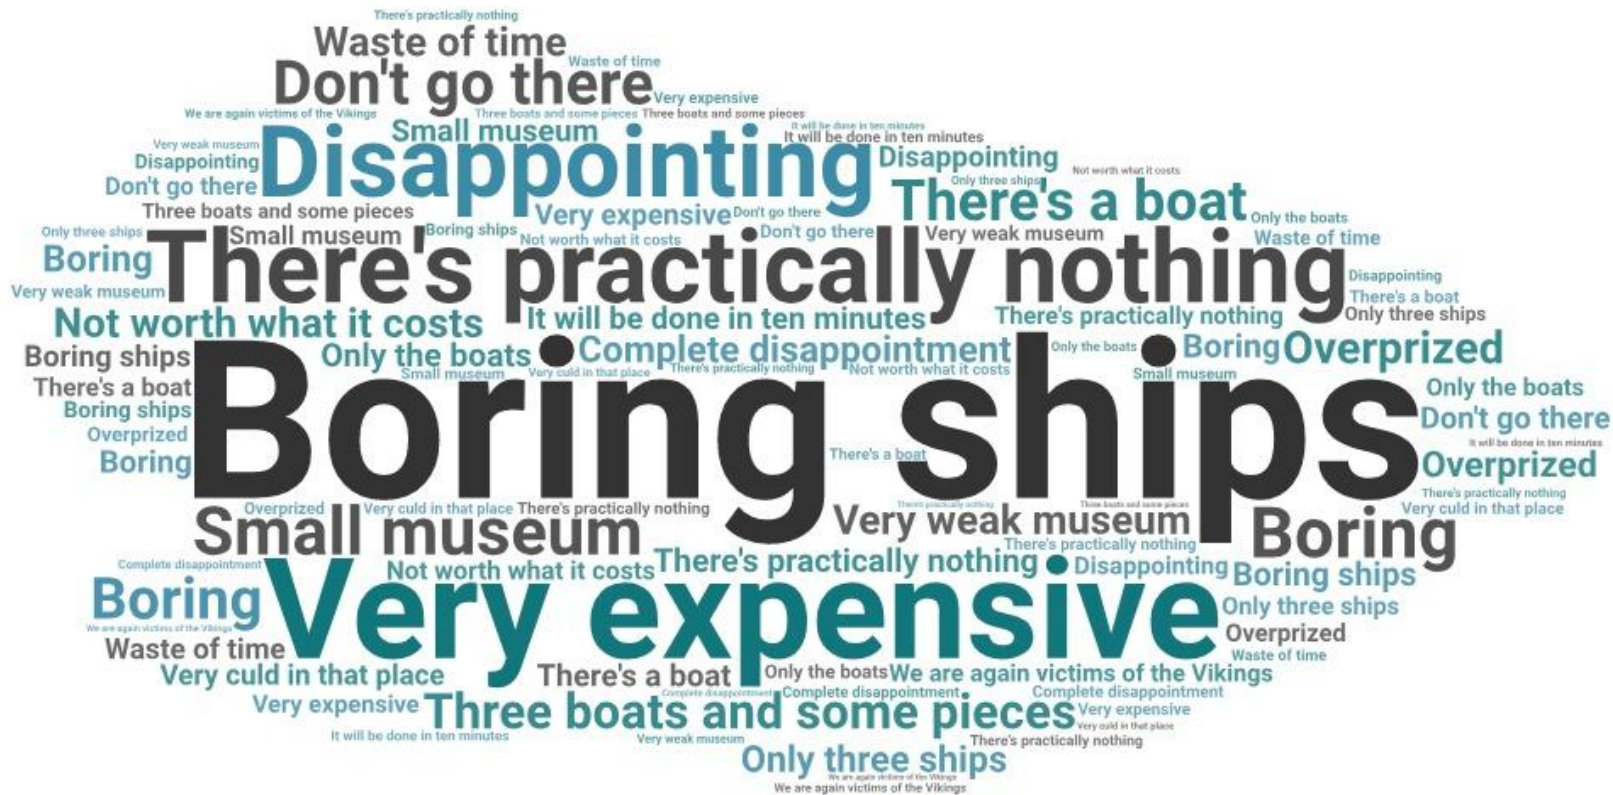

# SIDEN SIST

# SIDEN SIST

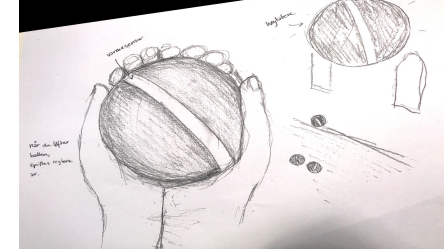

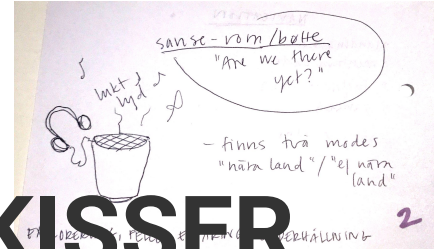

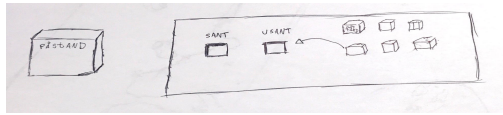

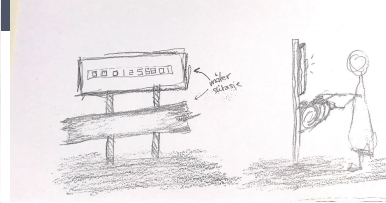

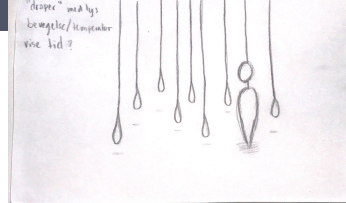

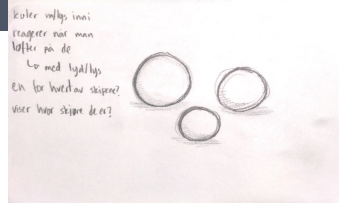

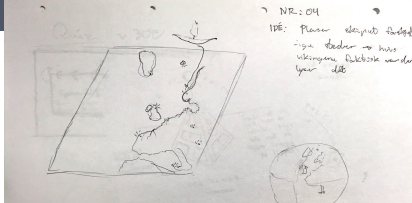

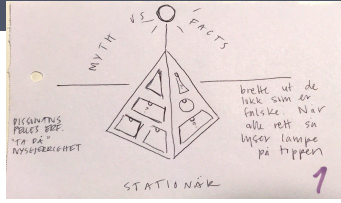

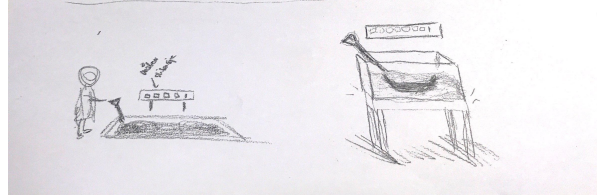

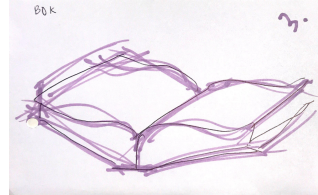

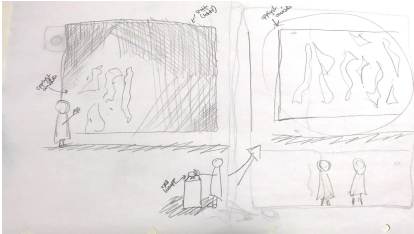

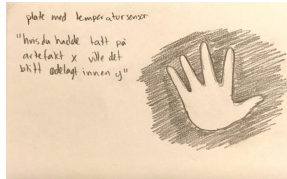

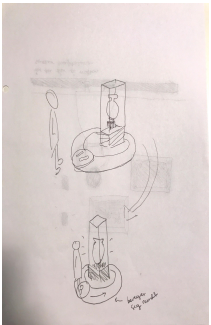

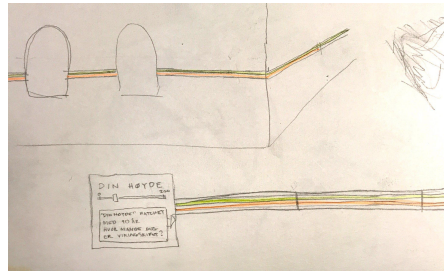

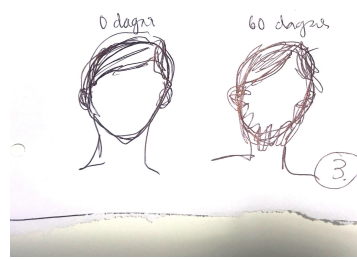

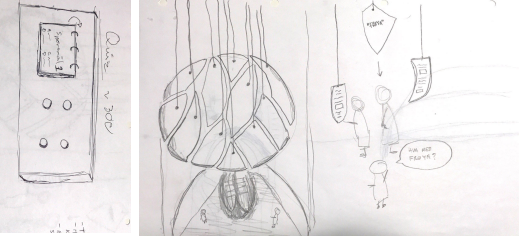

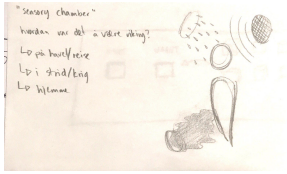

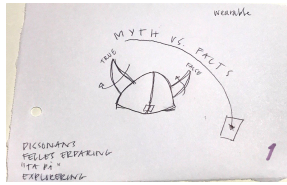

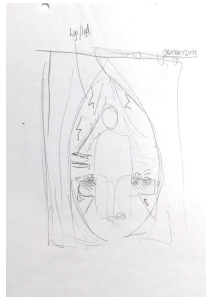

**Vekke nysgjerrighet**  
**Fremkalle interesse**  
**Skape underholdning**

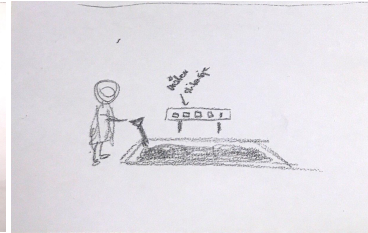

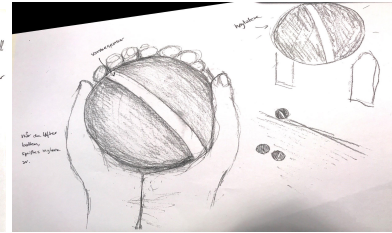

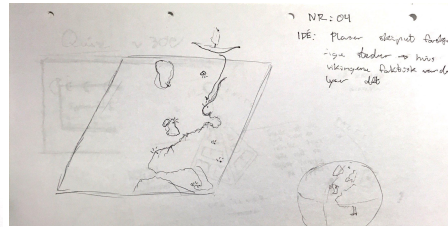

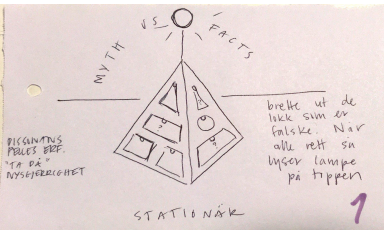

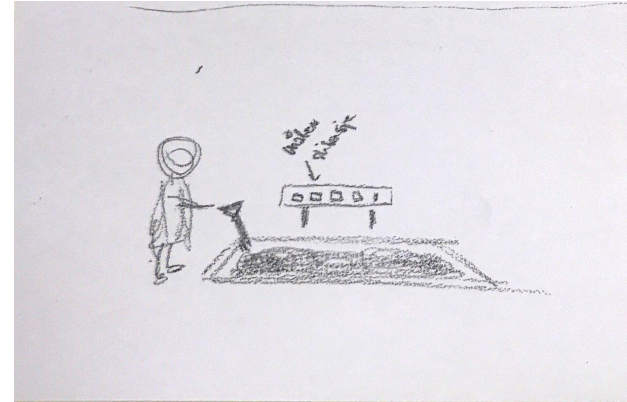

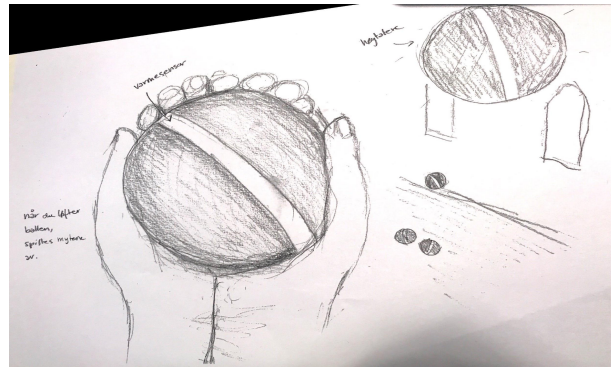

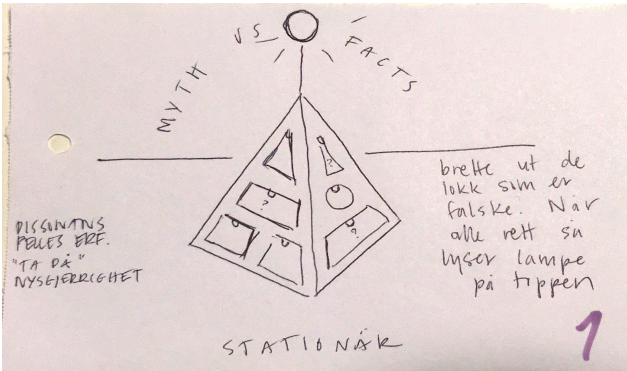

# VÅRE SKISSER

# RESULTAT AV EVALUERING

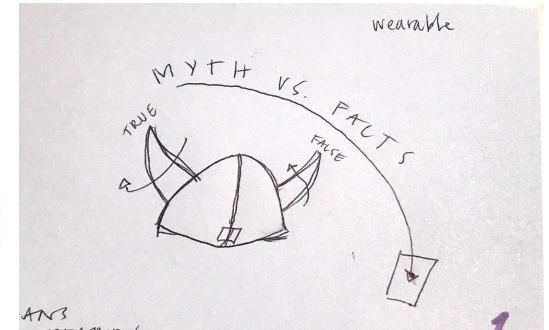

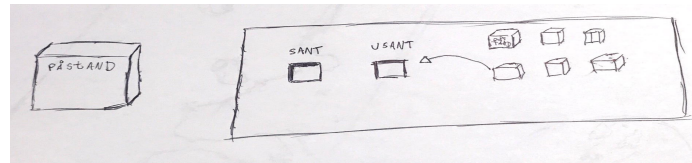

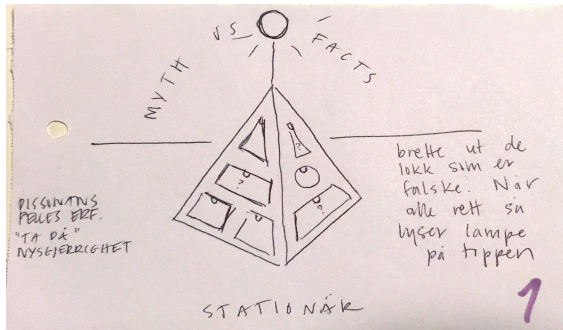

# RESULTAT AV EVALUERING

# FLEIP/FAKTA - Prototype 1

Stasjon

Samarbeid

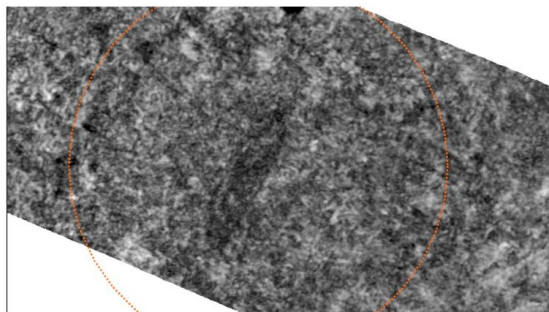

Fleip eller fakta

Arduino: knapper (to veier(?)), lys, lyd, trykk-sensor

# ARKEOLOGEN - prototype 2

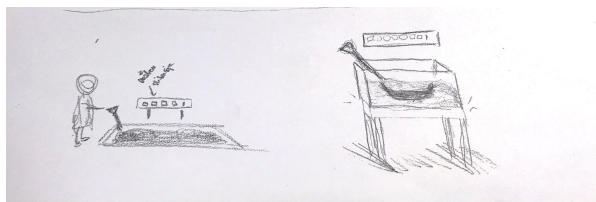

## Nytt funn av vikingskip i Vestfold

HORTEN (NRK): – Kommer til å bli lagt merke til over hele verden, sier klima- og miljøminister Ola Elvestuen.

FUNN: Funnet er gjort med georadar og bildene viser en tydelig båtforn, opplyser Vestfold fylkeskommune.

## Frykter at vikingskipene kan kollapse: – Må vurdere å stenge museet for publikum

Regjeringen bevilger ikke midler til nytt vikingskipmuseum. Universitetet i Oslo og Kulturhistorisk museum må vurdere å stenge Vikingskiphuset på grunn av fare for kollaps.

<https://www.forskerforum.no/frykter-at-vikingskipene-kan-kollapse-ma-vurdere-a-stenge-museet-for-publikum/>

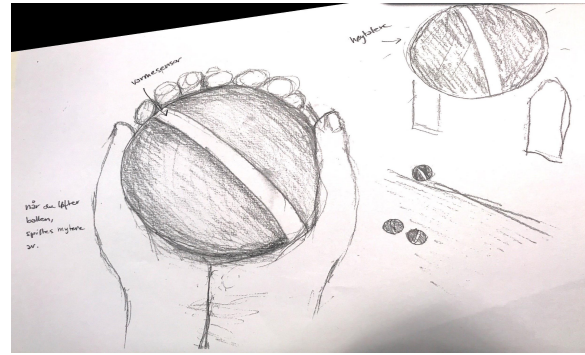

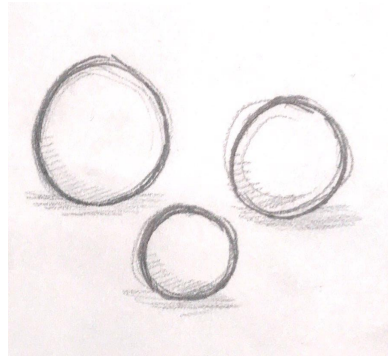

Konkretisere utgraving

Legge til rette for utforskning

Fysisk interaksjon

Arduino: trykk-sensor/lys-sensor (måle bruk), lys/lyd/haptisk (feedback til bruker)

# MYTEBALL - prototype 3

Bærbar

Dissonans

Taktil interaksjon

Interesse for utstilling

Arduino: temperatursensor, høyttalere, SD-kort shield/MP3 Player Shield, lys/haptisk

## VEIEN VIDERE

- Konkretisere konsept fra de ulike prototype-skissene
- Lage mer høyoppløselige modeller
- Evaluere
  - Med brukere i kontrollerte omgivelser
  - Teste form i kontekst
- Finne og sette tydelige krav
- Teste implementasjon
