

Peer Evaluation Form for Mandatory Assignments

IN3050 / IN4050 Spring 2025

The aim of peer-to-peer assessment is to enable students to demonstrate their understanding by discussing segments of their code with a peer reviewer. While students are permitted to utilize smart assistants to assist with mandatory assignments, it is imperative that they comprehend their code thoroughly.

Guidelines

- Peer pairs are assigned via e-mail, along with instructions on which parts of the obligatory assignment (which question numbers) the reviewer should ask about.
- During a 15-minute discussion, the reviewer asks the reviewee to elaborate on their code, based on the parts of the obligatory assignment they were told to ask about in the e-mail. The reviewee elaborates on their code based on the reviewers questions.
- Evaluation is binary: satisfactory or unsatisfactory.
- The reviewer should complete and sign this form, then upload it to Devilry by the specified deadline.

Review Criteria

- Assignment: 2 ☐ 3 ☐
- Reviewer: _____
- Reviewee: _____
- Question numbers: _____
- Result: satisfactory ☐ unsatisfactory ☐

Signature of reviewer
