Design of information systems group

Design and research (again)

Two hats

- research: produce knowledge in a systematic way
- & design: produce artifacts

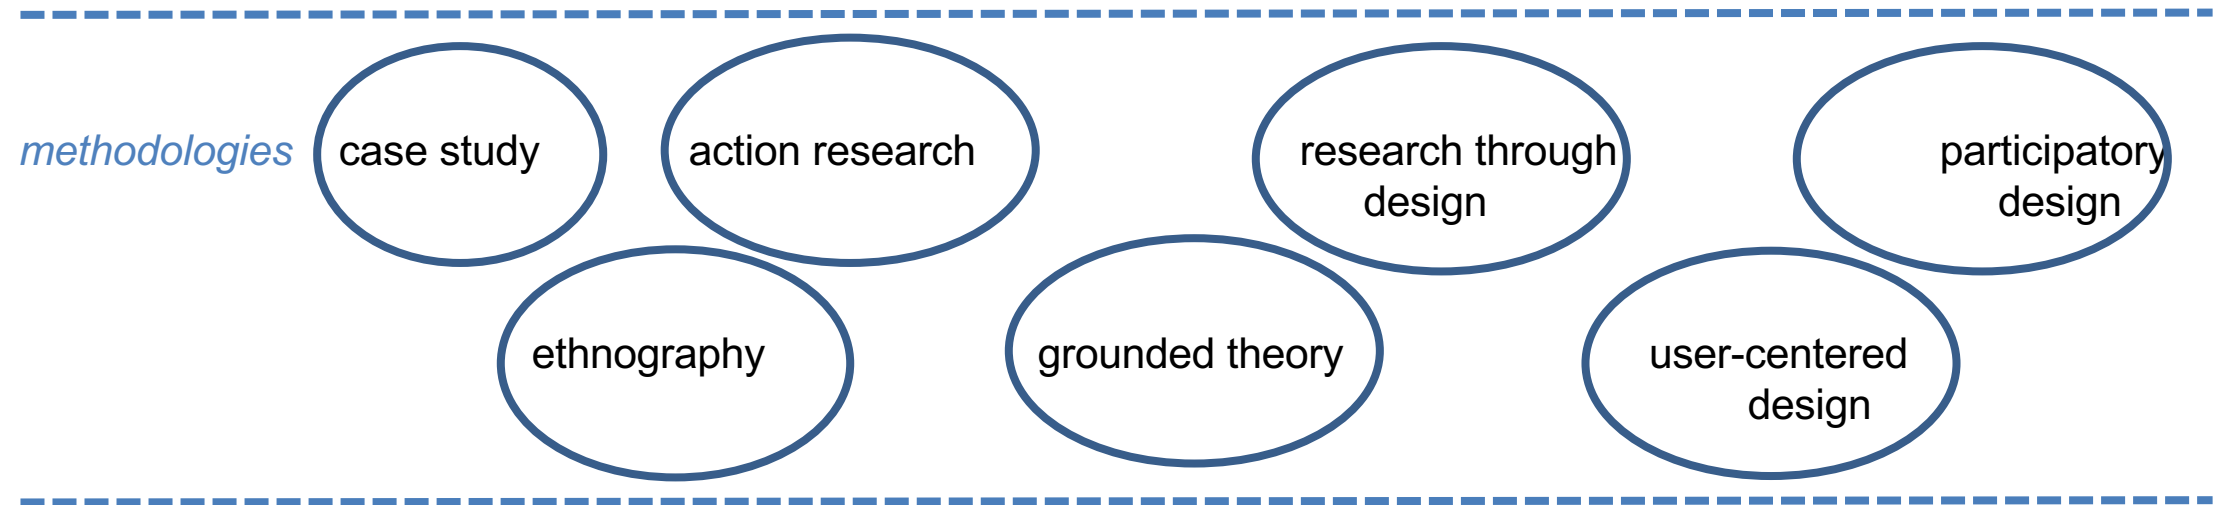

Confusion when doing design is part of the research

- the same activity can produce knowledge and artifact
- in the activity the designer-researcher wears two hats

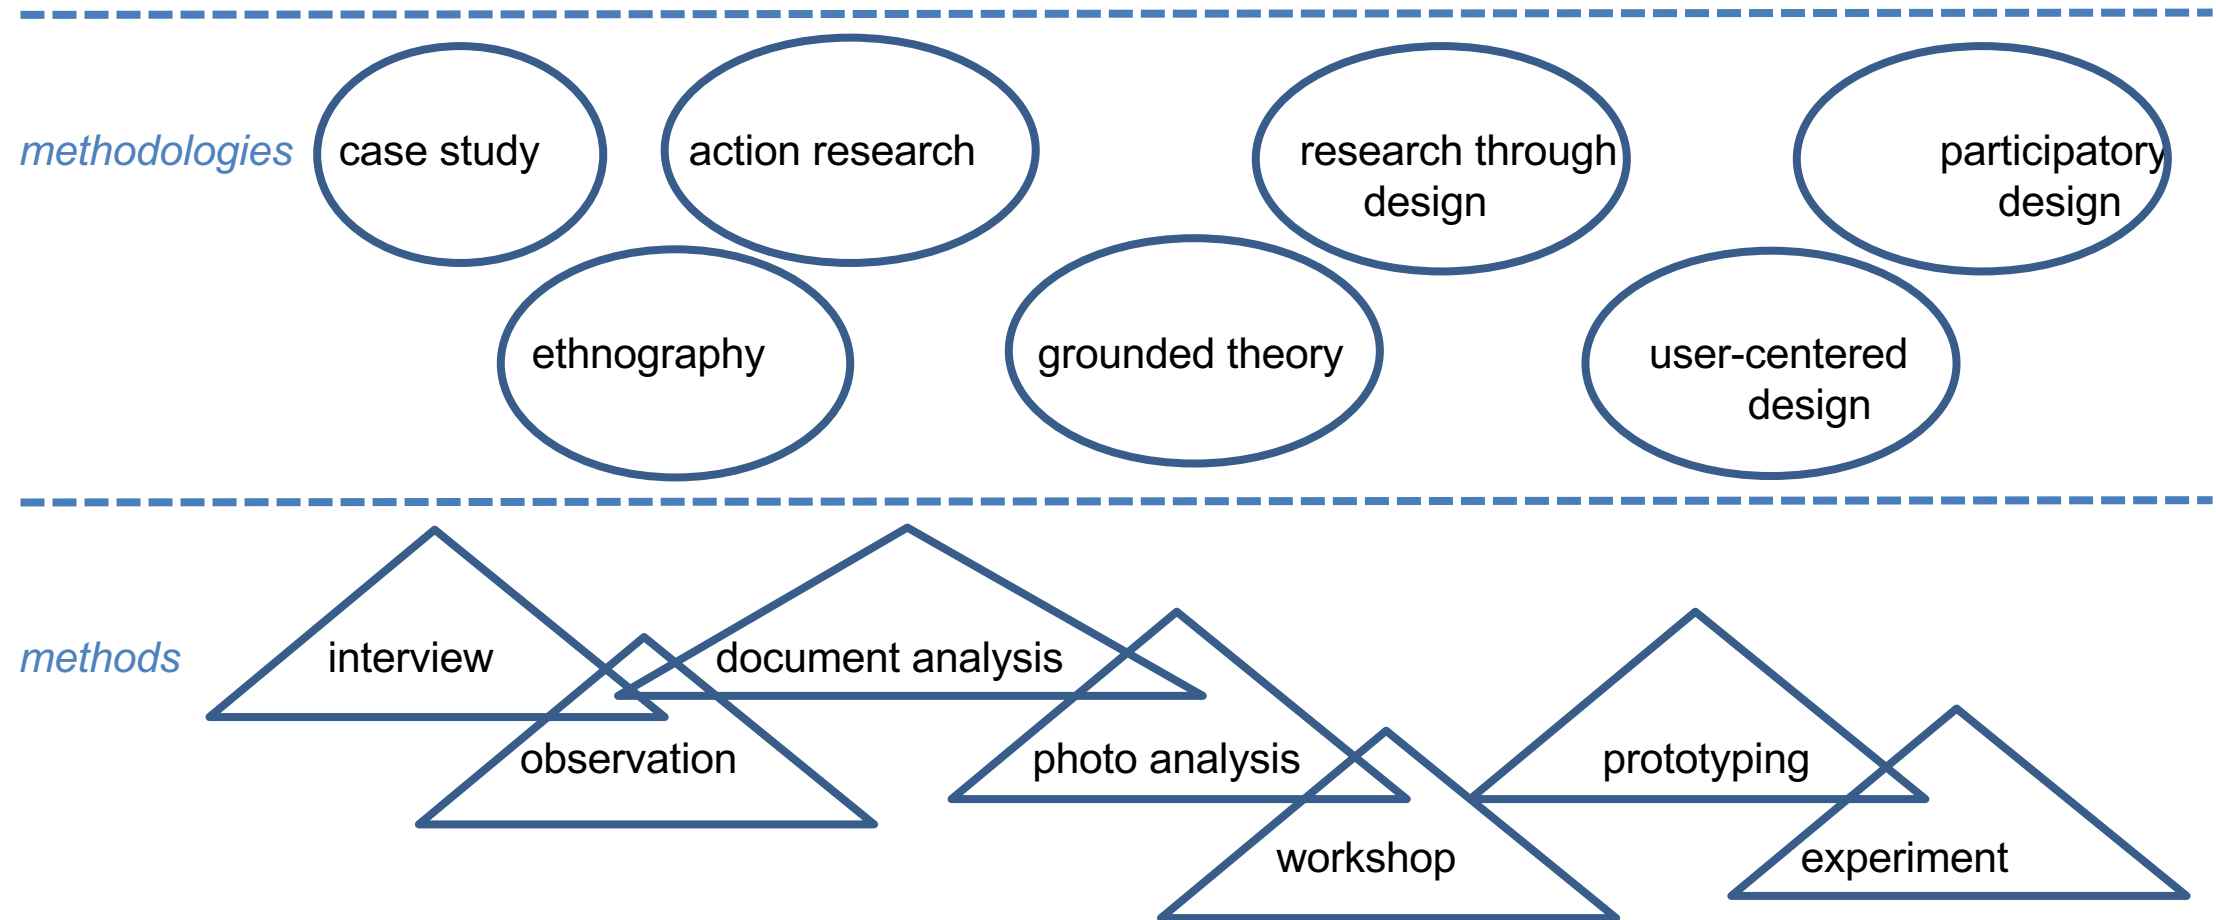

To make something is part of asking and answering (*Kalleberg*)

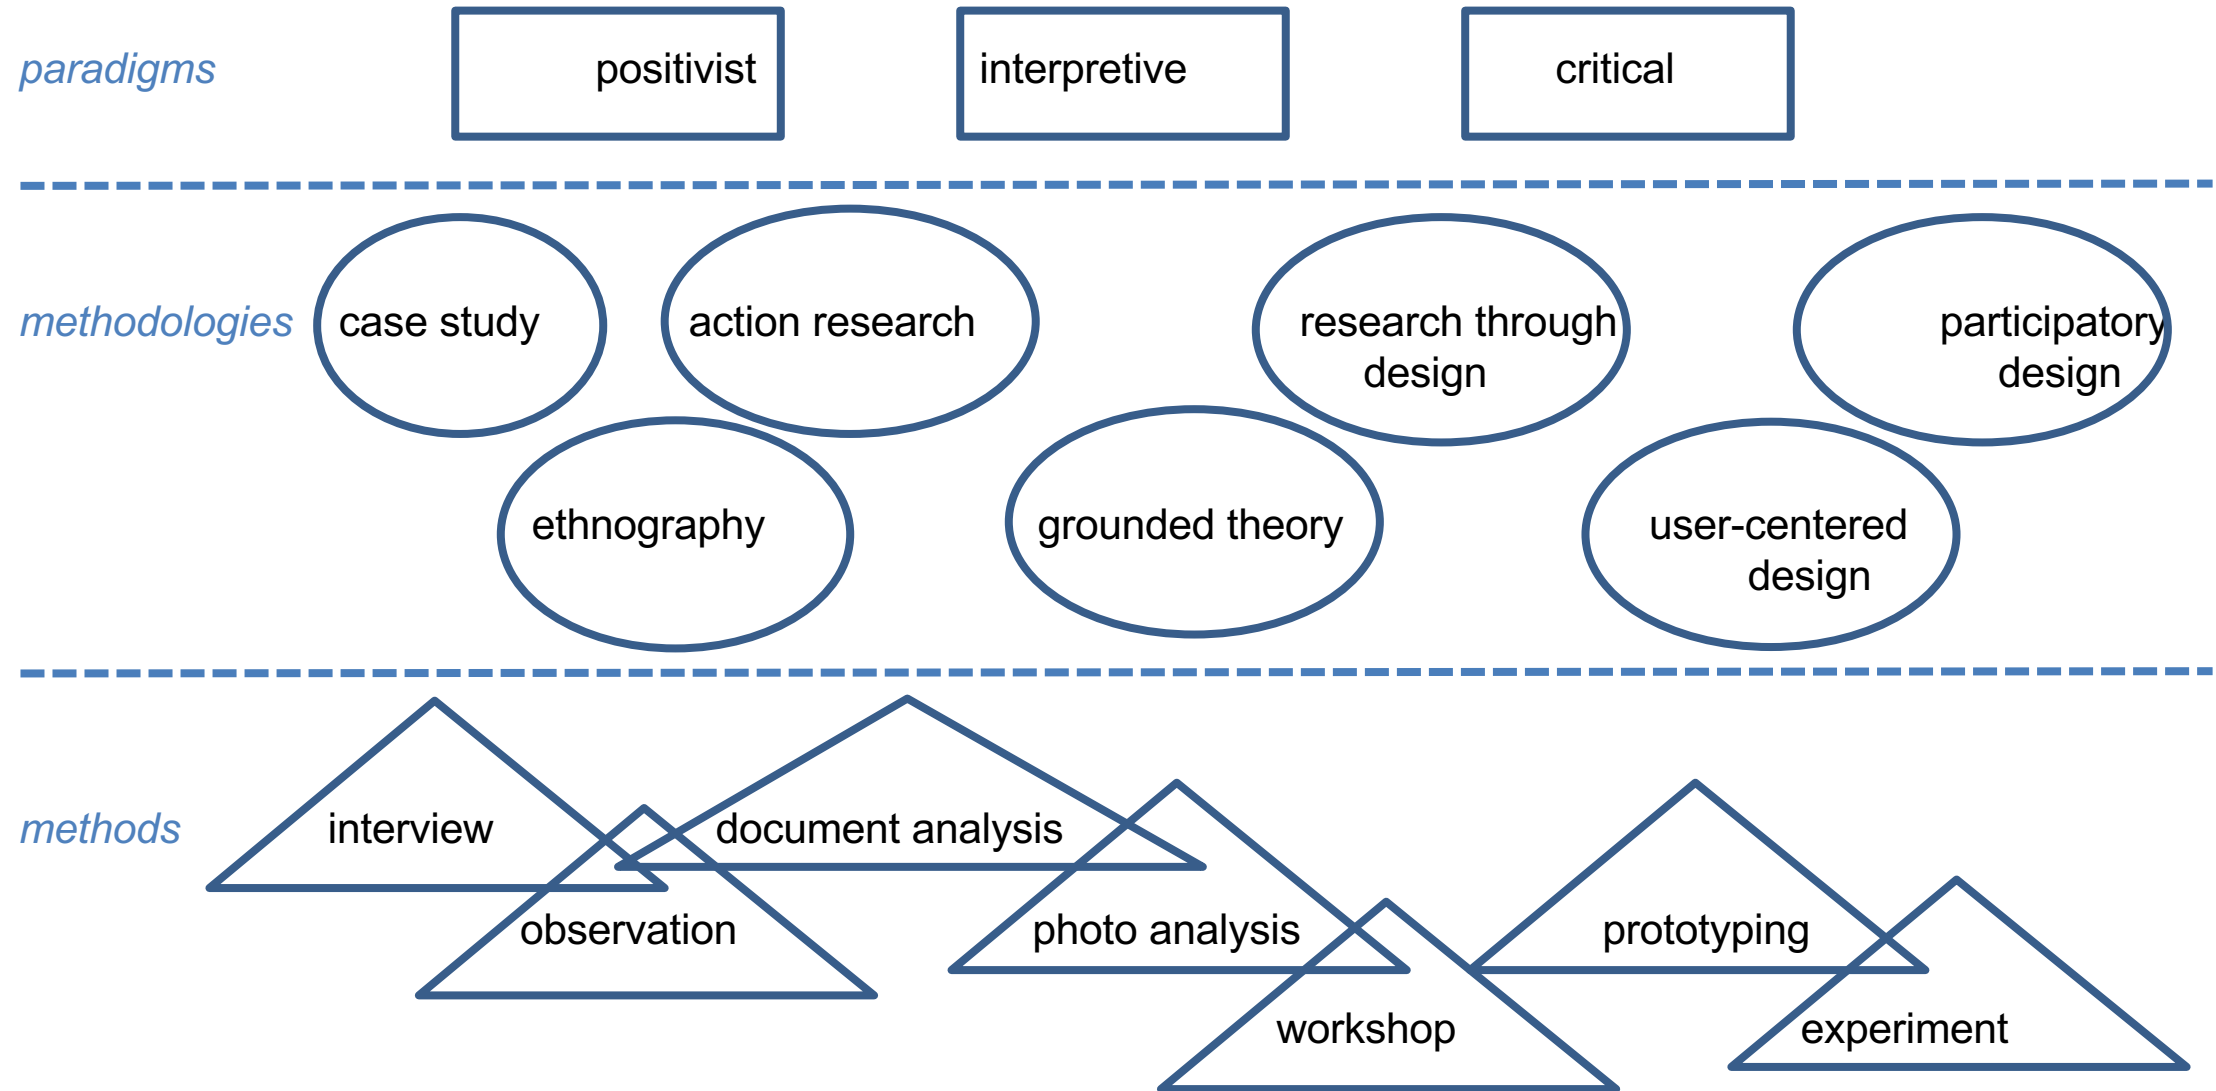

Methodologies, methods and paradigms

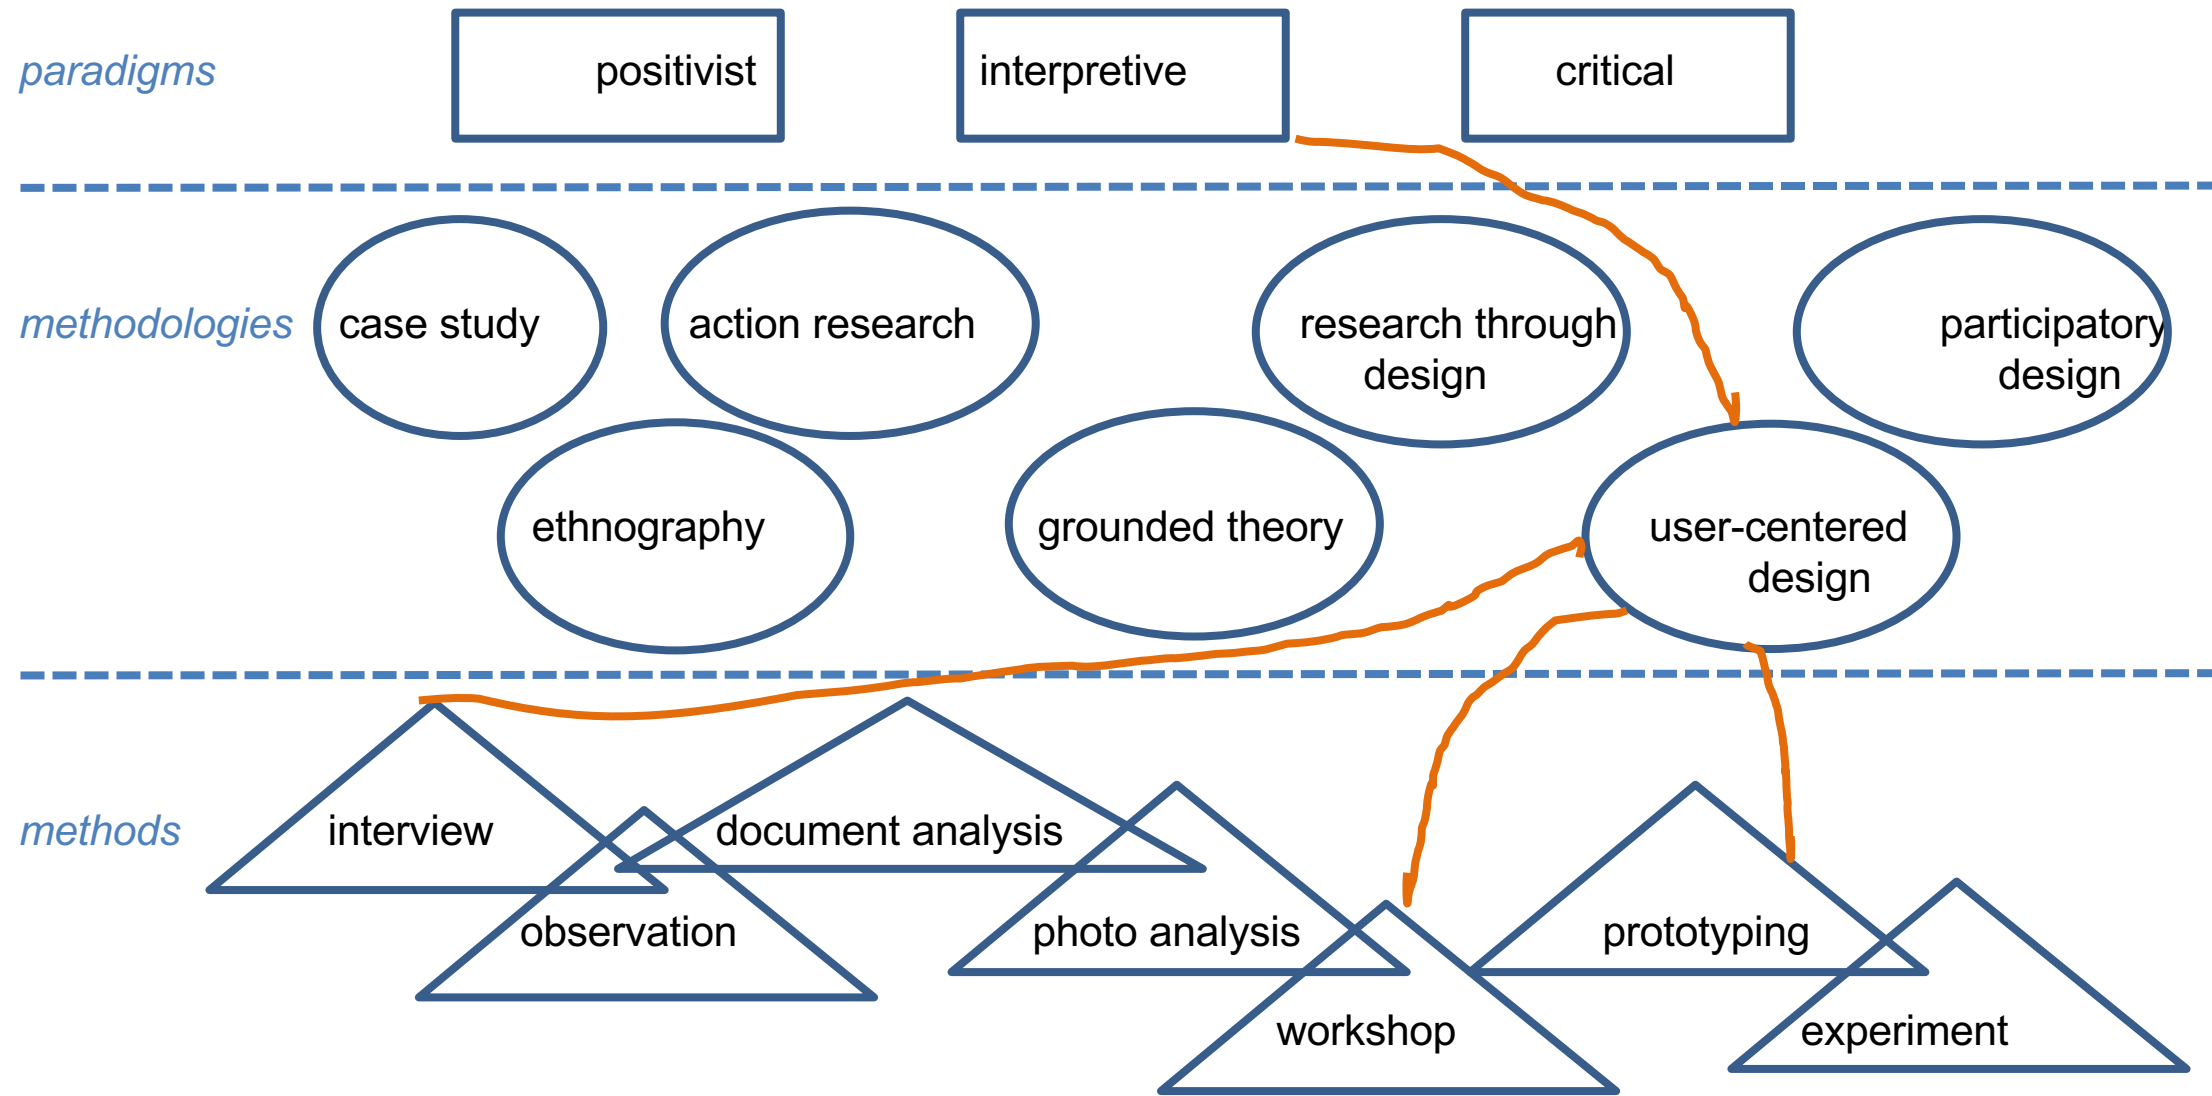

Methodologies, methods and paradigms

Methodologies, methods and paradigms

Paradigms, methodologies and methods, example UCD

Discuss in groups

Does this understanding of paradigms and methodologies make sense to you? How?

Where will you locate your own master work?
