

IN5140 – Smart processes and agile methods in software engineering

Exam hints

Preparation

- Read the books
- Read the slides, particularly those that deal with topics not covered in the book
- Go through the weekly exercises and your project
- Go through earlier exams

Exam

- 10% multiple choices
- 20% drag and drop, drop down choice, etc.
- 30% open text questions
- 40% case-study with questions

At the exam

- Read the exam text carefully
- Try to answer (at least something) to all questions.
- Plan your timing carefully
- Answer strictly the questions, not something else
- Emphasise good structure in your answers, possibly bullet points
- Avoid being verbose; try to be concise = high information density
- Introduce and justify your own assumptions if you find it necessary

Previously asked questions

- Do I need a calculator?
 - Probably not
- Can I answer in Norwegian? Can I bring a dictionary?
 - Yes you can answer in Norwegian or English. No you cannot bring a dictionary
- CAFFEA framework:
 - You won't need to remember the framework
 - It's good to familiarize (not memorize) with the findings
- Will there be questions on Process and Social debt?
 - No, only technical debt
- Will there be questions from the industrial presentations?
 - definitely

Questions?

Good luck on the exam!
