IN5420 Spring 2022 - Mandatory Assignment

Implement a simple PoW blockchain

Deadline: Wednesday 16th of March

1 Installation

For this assignment, you need to have installed Python and Jupyter notebook on your local machine. We recommend using the Anaconda distribution to install them. Follow the instruction here:

`https://docs.jupyter.org/en/latest/install/notebook-classic.html`

Once installed, launch the Jupyter notebook by typing *jupyter notebook* on your terminal. In the opened window navigate your file-system and select *IN5420-Assignment.ipynb*. The file can be downloaded from the course website.

2 Deliverable

The assignment is individual and on the 16th of March you will individually present your implementation to the TA (Andrea). You will show your notebook, run the code cells and explain what you have been doing.
