Examinable material

- Mostly, the technical content but there could be brief questions that ask you to reflect on the oral presentation techniques
- The first introductory lecture
- Presentation slides
- The exact list of papers/sources included in the examinable material can be found in the record for this summary lecture
  - Somewhat reduced compared to the reading material list
  - For master students: the Algorand paper is also excluded
  - For PhD students: all papers are included

Typical questions for a paper

- What is the main idea proposed in the paper?
- Main concepts?
- Solution elements?
- How was evaluated?
- Your critical reflection: Novel? Realistic? Well-written? Useful in what application domains?
