

Obligatory assessment 3

Due date: April 28th, 2022 papers to be submitted via email by 10 am.

Deliverables

- A *position paper in ACM format, max 4 pages*

Drafts to be brought to class for reading and feedback on Thurs 21st.

Task:

Write a position paper where you define a topic/issue, then develop an argument for your position on this issue. (You should position how will you *approach* addressing the topic/issue theoretically, not how will you study this topic/issue methodologically.)

The topic issue can be something that has arisen out of this course, or something related to your master's project.

Examples

Here are some examples of positions papers, some more theoretical than others:
