Collage workshop

Make - Say - Make - Say
11/09/2024

Agenda

01

What

What is a collage workshop

02

Your turn

Your own collage exercise

03

Discussion

General discussion

04

In PD

How to use it in PD

01
What is a collage exercice

4 rounds: make, say, make, say

First round

1. Make

Describe a situation, what you're going through, who are the participants, what is the situation like, what opportunities do you see?

2. Say

Discuss for the group

Share thoughts, what do you like, what kind of ideas do you get, is anything missing?

4 rounds: make, say, make, say

Second

3. Make

Create a collage or drawing to show what you think might be an ideal (the word ideal is not very PD) situation/future.

4. Say

Discuss for the group

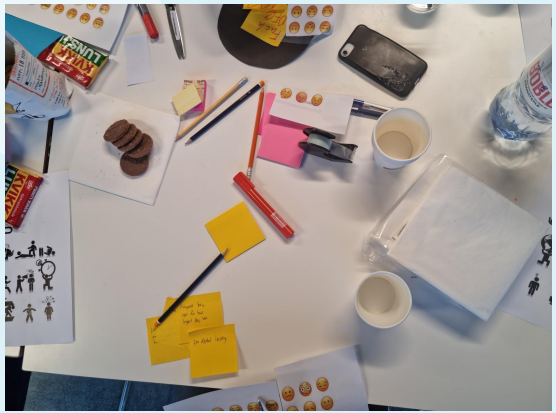

Share thoughts, what do you like, what kind of ideas do you get, is anything missing?

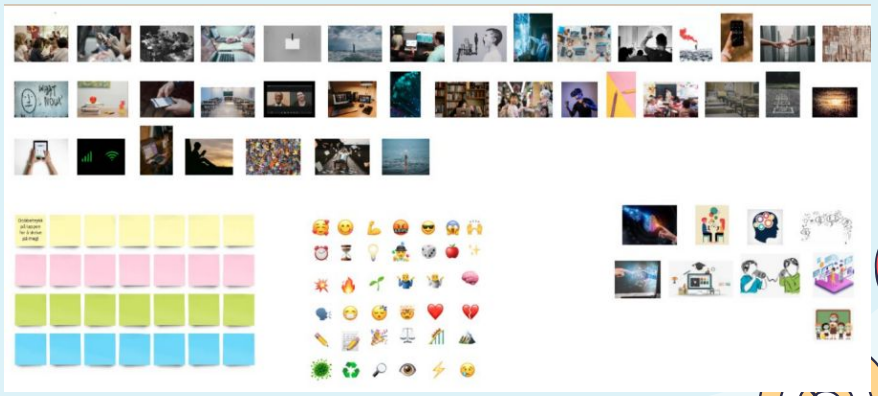

Aboout collage exercice

1. Great exercise in working creatively with participants
2. Enables users to explore the future through images
3. Adaptable to all contexts, individually, in groups, in pairs
4. Images can be replaced with other physical artefacts → Lego, clay, paint
5. Can be made super specific or broader
6. Can be used in conjunction with other methods, tools and techniques

Eksempel fra et studentprosjekt i 2023:

Find out how participants use DFØ (payroll system)
Wanted to investigate what they think, feel, experience how they use it

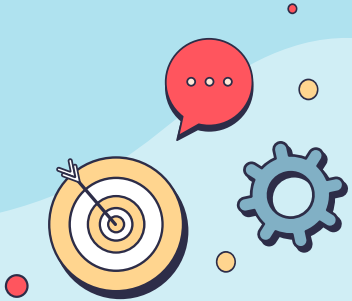

Example:

1. Make

Describe what you think and feel when you use DFØ, using pictures, post-its and drawings

- Things that can be useful to think about:
  - What are you going through?
  - What is the situation now?
  - Who are the interests?
  - What opportunities do you see?

- You do it alone for 5-10 minutes

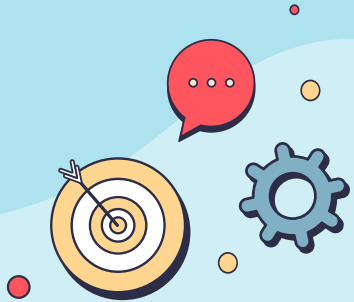

Example:

2. Say

Present to your group

Discuss:

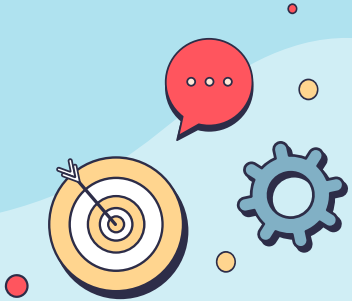

- What did you like, what didn't you like?
- What ideas or thoughts did you have?
- Do you feel there is any missing information?

Example:

3. Make

- Take the thoughts you just discussed and create a new collage!
- What do you think is an ideal situation for you when you start using DFØ?

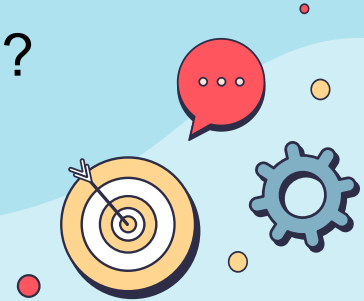

Example:

4. Say

Present again to your group

- Discuss:
  - What did you like, what didn't you like?
  - Did you get any NEW ideas?
  - Do you feel there is any information missing?

Did you enjoy collage-ing?

Think about this before, during and after the WS

- Are participants used to mapping processes?
- How can you engage the participants?
    - If you have “non creative” people, it can be hard for them to draw or express their thoughts.
- Are participants used to telling stories?
- Have you thought about how you as a facilitator can help participants to be creative and activate them?

2. Your turn

Groups of 4

Theme of the day

Foodwaste

Make

Foodwaste

Think about:

- Where are you standing
- What do you experience
- What is your perspective
- What possibilities ?

Say

Food waste

Present you thoughts to your group:

Discuss:

- What did you like? Not like?
- Ideas?
- Are we missing information?

Make

Food waste

- New session!
- Make a new collage where you discuss your ideas and bring it forward
- What do you think could be better future?
- Are there new paths to explore?

Say

Food waste

Present you thoughts to your group:

Discuss:

- What did you like? Not like?
- Ideas?
- Are we missing information?

3. Discussion

Say

What did you guys discuss?

Is collage workshop fun?
Not fun?
Why?

Is this a UCD way of doing design or is it PD?

What you discussed

Group 1:

- Smart fridges: smarter planing, do not overbuy
- Felles kjølelskap (common fridge), make it online? Deliver food inside?

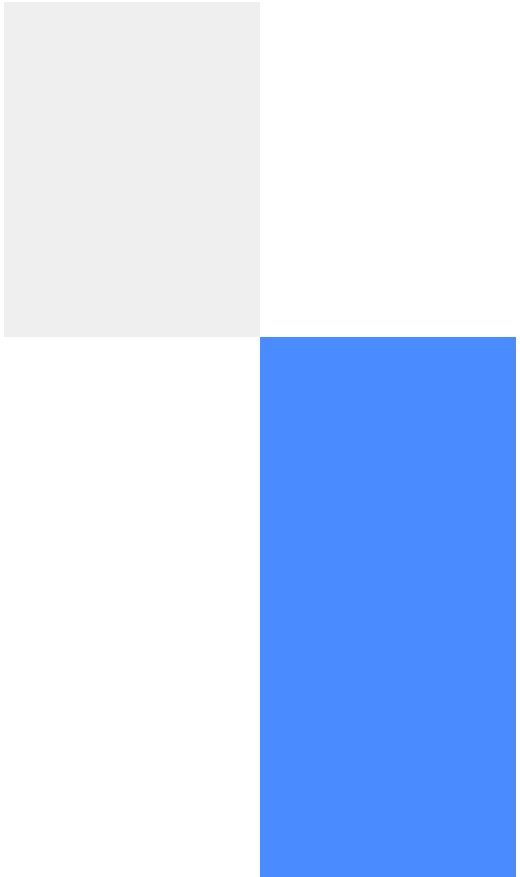

Group 2:

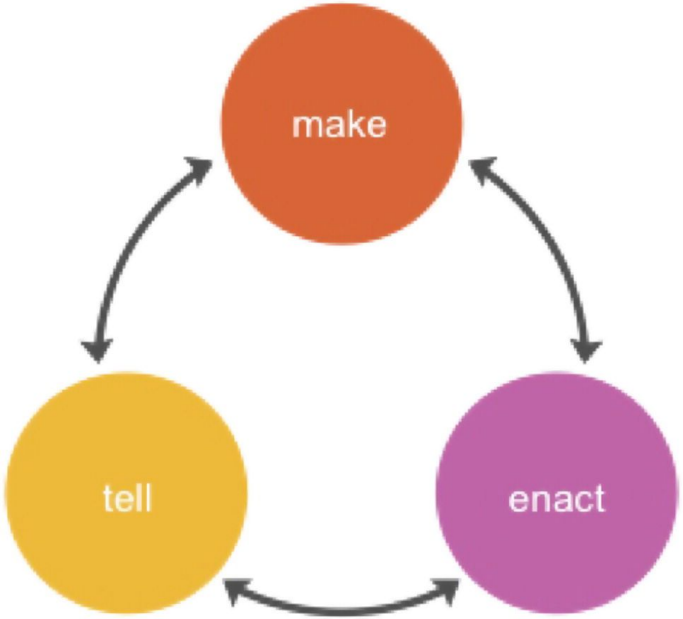

- People producing food, stores, how food waste happens there.
- Way for people to buy expired food easier (make dumpster food legal in a way?)
- Outlet for damaged food
- Do not waste “ugly” food
- Avoid packaged food/ self service vegetables

Group 3:

- Smart fridge with an app
- The app can make recipes, what to purchase
- Step by step recipes
- Better fridge organisations

4. In PD?

Probes, toolkits and prototypes: three approaches to making in codesigning

Sanders & Stappers, 2006

What to think about during your project

- **Can you have a PD process in 2 months?**
- **Always smart to refer to an article if you can**
- **Have weekly meetings with your groups to discuss the papers/curriculum**
- **Justify your choices (why did you pick the following participants, why did you conduct this workshop?)**
- **Think about participation, mutual learning, ‘having a say’, what is the essence of PD?**
