

Application of Open Source Software in BEKK

- Eivind Barstad Waaler
- INF5750 - 05.05.2008

Today

- Who?
- Why?
- What?
- Examples
- BOSS

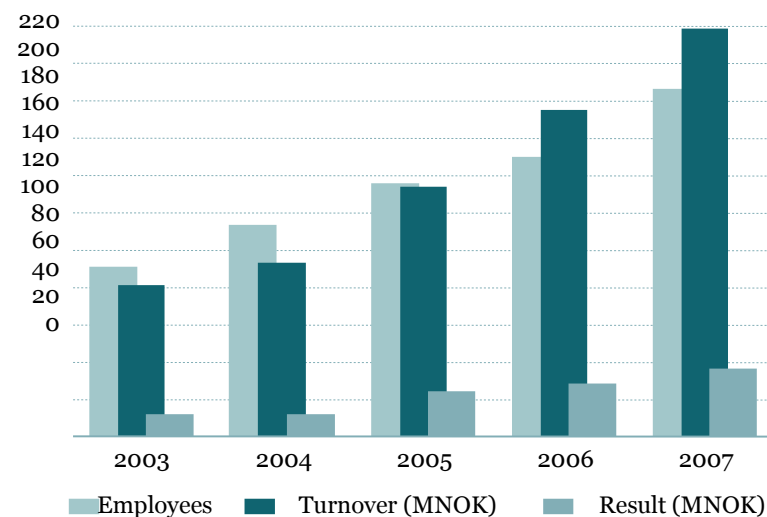

Eivind & BEKK

- Eivind (31)
 - HiST + UiO
 - BEKK since september 2000
 - Open Source & Development Architecture
- BEKK
 - IT-Consultants in Oslo – Vippetangen
 - Projects in Norway and internationally
 - ErgoGroup main owner (75%)

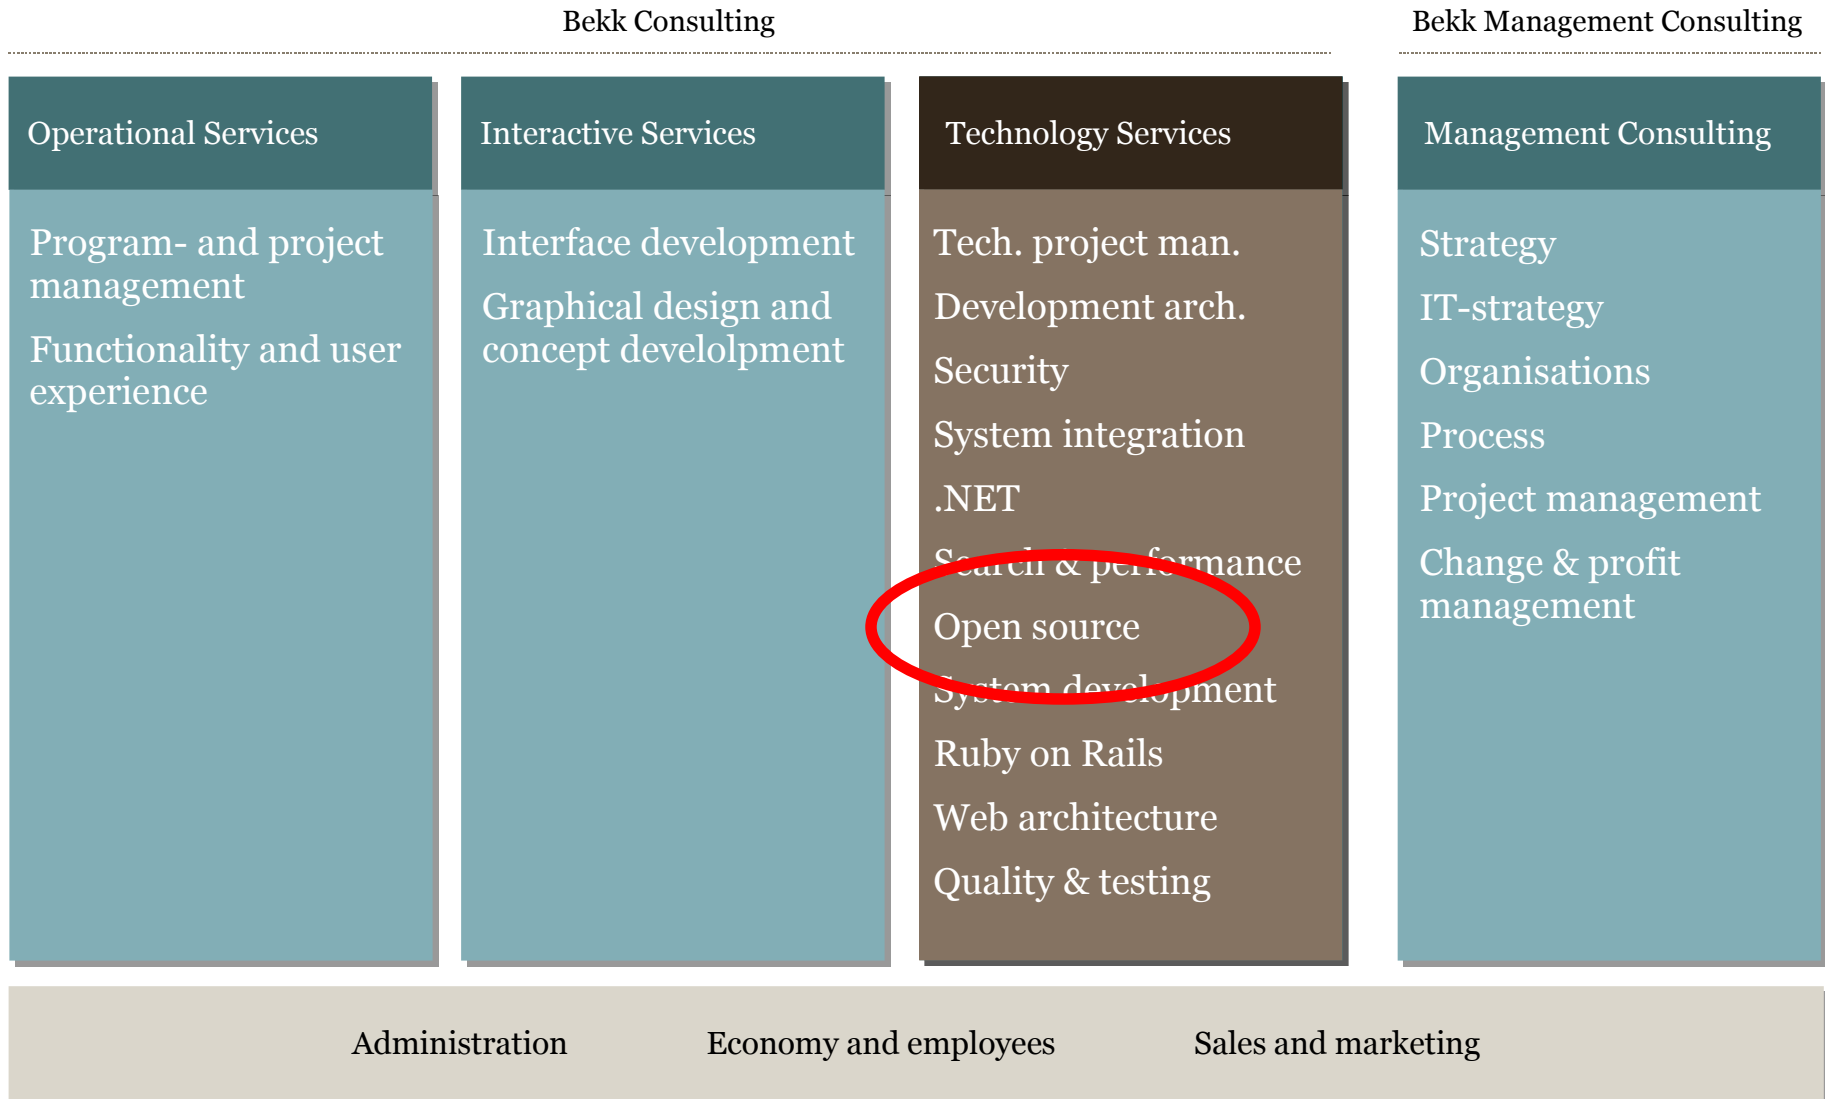

Employee statistics

Number of employees	200
Average age	32 år
Women	21 %
Education master level	90 %

Employees/ turnover/ result

Wide competency; 4 departments, 21 comp units

OSS in BEKK

■ 2001

- OSS defined as “important” and “possibly useful”
- XO → Log4J, JUnit, Ant ++
- Middlegen

■ 2002

- BOSS – BEKK Open Source Software

■ 2004

- “Architecture & Open Source”
- JavaZone – Hibernate + Open Source Agile Architectures

■ 2005 – 2008

- OSS part of life
- Driver on ALL projects
- JavaZone, projects, BOSS, master thesis ++

Why OSS?

- Free
- Open
- Communities
- Survival of the fittest!
- OSS solves real problems...
- Commercial products earn money...
- → OSS often high quality!

What we use

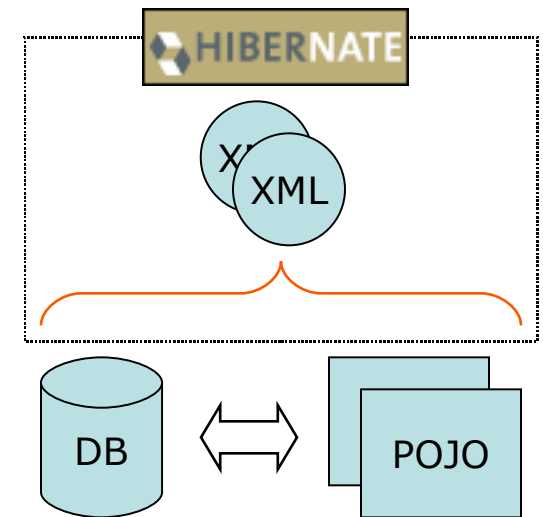

- Frameworks
- Development
- QA
- Products/Platforms
- Only licenses set limits – problem: GPL

Important OSS frameworks

- Spring
 - Light-weight/non-invasive
 - Dependency Injection → testing!
 - AOP
 - Plain Java
- Hibernate
 - Standard ORM tool
 - Domain model focus!
 - EJB3 driver
- Struts2/WebWork
 - Testability
 - Plugin based
 - Extensible

Spring

Struts²

OSS for development

- Eclipse
 - High quality IDE!
- Ant
 - Standard “make” tool for Java
- Maven
 - More advanced “make”
 - Dependency management
 - Reporting
- CVS/Subversion
 - Easy to use
 - Standard on many projects

OSS Quality tools

■ Testing

- JUnit/TestNG
- JCoverage
- FitNesse
- Selenium

■ Code verification/control

- Checkstyle
- PMD
- FindBugs

■ Issuetracking/Wiki

- Mantis
- Trac

OSS products/platforms

- **Linux**

- Common on servers
- Easy maintainance

- **JBoss**

- Hight quality Java App server
- Wide range of tools

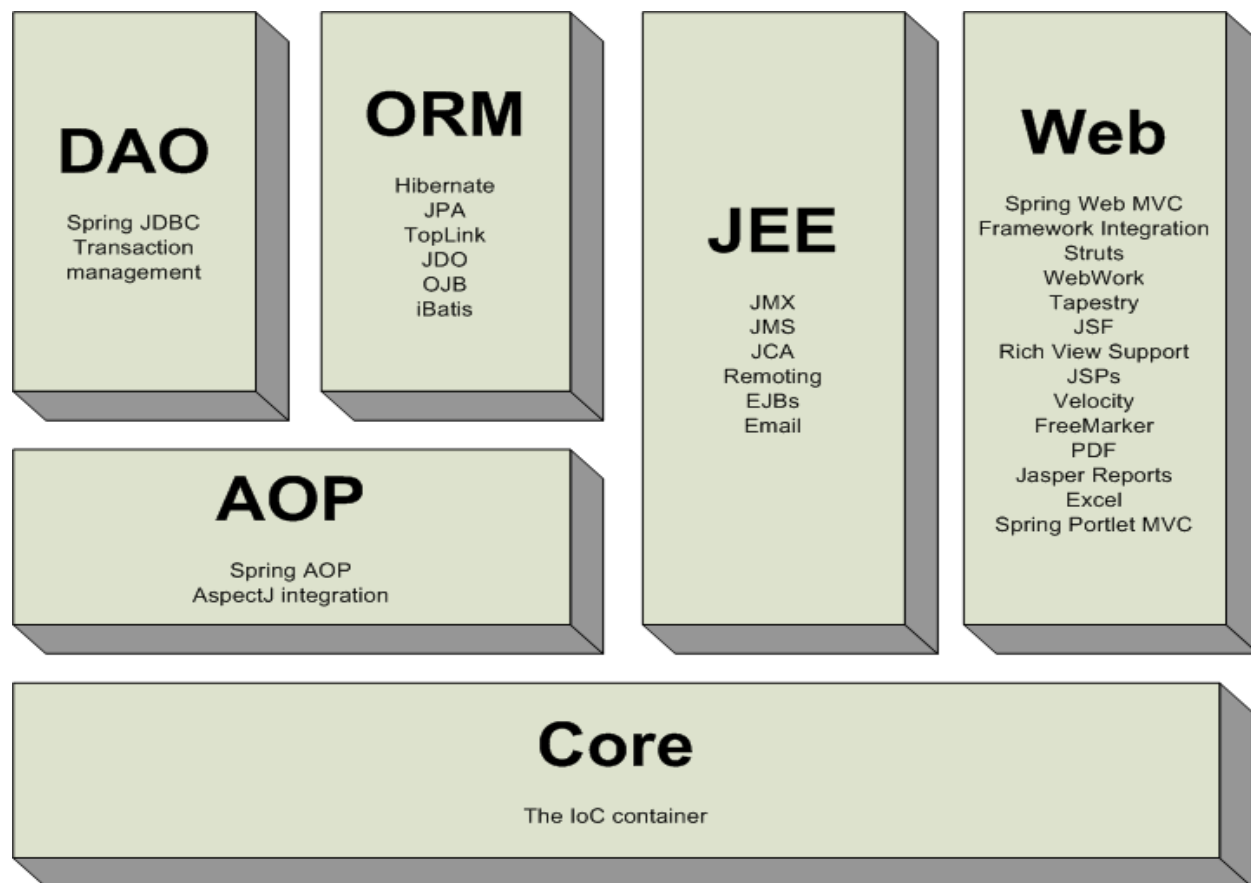

- **Tomcat/Jetty**

- Servlet/JSP ref. implementation
- Light-weight development
- Best friends with Spring!

Spring – usage and examples

- De-facto standard in Java enterprise world
- Java Application “glue”
- Examples...

Spring dependency injection

- Focus interfaces/testability
- Good OO practices
- Avoid *new* → DI
- Simpler integration testing

Spring AOP

- Logging
- Transactions
- Caching
- Custom extensions

Spring Web Service

- Write Java – interface + implementation
- Spring configures remote interface
 - Web Service
 - JMS
 - RMI
 - Hessian/Burlap
 - ++
- WSDL, Schema ++ generated!

Spring database

- Direct access
 - Spring JdbcTemplate
- ORM
 - Hibernate
 - EJB3

```
package uiotest;

import org.springframework.jdbc.core.support.JdbcDaoSupport;

public class DAOExample extends JdbcDaoSupport {

    public int getNumberOfPersons() {
        return getJdbcTemplate().queryForInt("select count(*) from persons");
    }
}
```

Spring scheduling

- Create runnable
- Spring integrates scheduler

```
package no.bekk.boss;

public class SampleRunnable implements Runnable {
    public void run() {
        System.out.println("SampleRunnable running.");
    }
}
```

```
<bean id="cron"
      class="org.springframework.scheduling.quartz.CronTriggerBean">
    <!-- Every morning at 6 AM -->
    <property name="cronExpression" value="0 0 6 * * ?"/>
    <property name="runnable" value="sampleRunnable"/>
</bean>
```

Example projects

- Norwegian
 - OSS SOA project
- Forsvaret
 - Pure OSS implementation
- Gjensidige
 - Mixing OSS and commercial products

Norwegian

- JBoss
- Linux
- SOA “done right”!

Norwegian – the airline company

The screenshot shows two browser windows from Mozilla Firefox. The left window displays the Norwegian website's home page with a search form and a list of flight prices. The right window shows the search results for a flight from Oslo (OSL) to Trondheim (TRD) on Thursday, October 19, 2006.

Search Form (Left Window):

- From: Oslo (OSL) - Vek
- To: Trondheim (TRD) - Enkel
- Utreise: 19 okt. 2006
- Retur: 19 okt. 2006
- Voksne: 1
- Barn (2-15): 0
- Spedbarn: 0

Search Results (Right Window):

Utreise: Oslo - Trondheim (Torsdag 19. okt 2006)

Avgang	Ankomst	Reisetid	Full fleks	Lavpris
07:20 Oslo	08:15 Trondheim	0:55	1394 kr	368 kr
08:05 Oslo	09:00 Trondheim	0:55	1394 kr	368 kr
08:50 Oslo	09:45 Trondheim	0:55	1394 kr	368 kr
10:40 Oslo	11:35 Trondheim	0:55	1394 kr	368 kr
13:15 Oslo	14:10 Trondheim	0:55	1394 kr	557 kr
15:40 Oslo	16:35 Trondheim	0:55	1394 kr	768 kr
16:15 Oslo	17:10 Trondheim	0:55	1394 kr	768 kr
17:45 Oslo	18:40 Trondheim	0:55	1394 kr	1194 kr
18:55 Oslo	19:50 Trondheim	0:55	1394 kr	768 kr
20:00 Oslo	20:55 Trondheim	0:55	1394 kr	768 kr
21:30 Oslo	22:25 Trondheim	0:55	1394 kr	557 kr

Retur: Trondheim - Oslo (Torsdag 19. okt 2006)

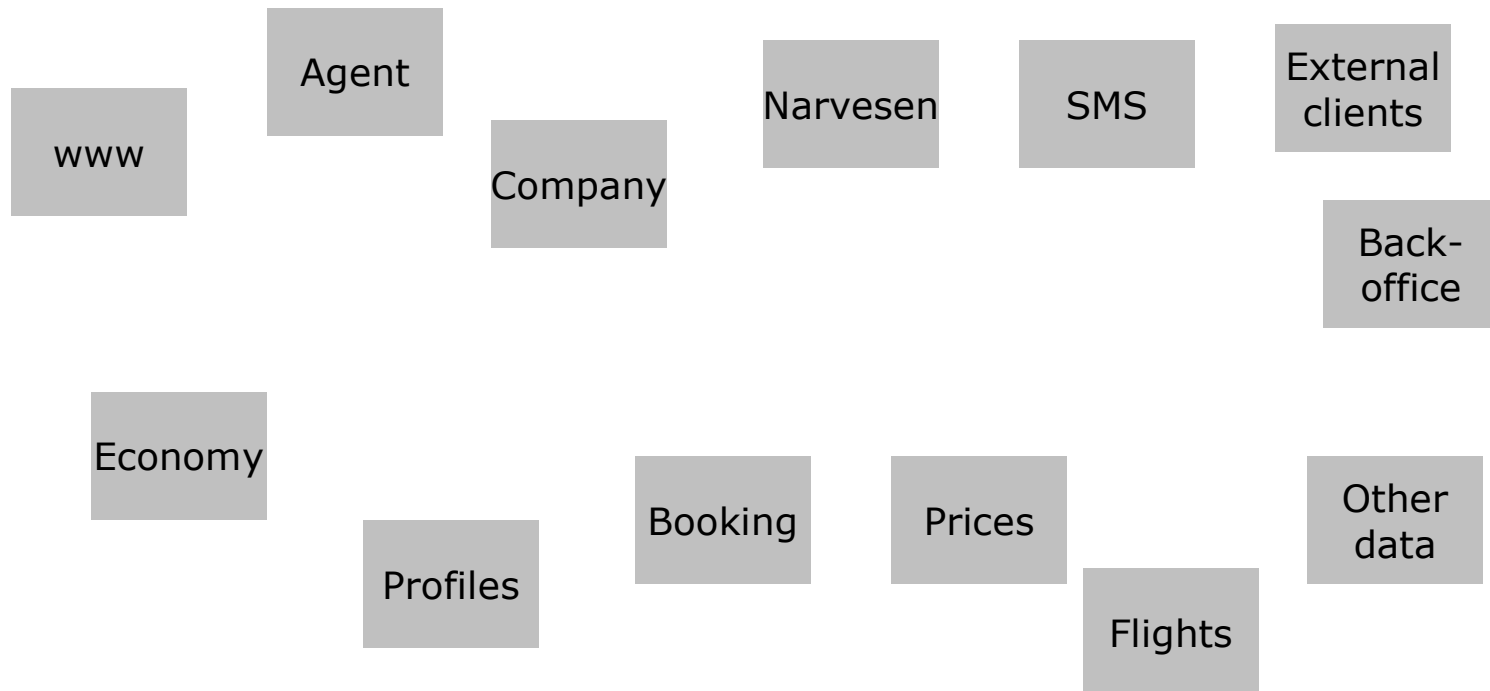

Avgang	Ankomst	Reisetid	Full fleks	Lavpris
06:45 Trondheim	07:40 Oslo	0:55	1394 kr	768 kr

Summary (Right Window):

- Utreise:** Oslo - Trondheim, Torsdag 19. okt 2006 kl. 07:20, Rute DY742 - Lavpris, 1 Voksen, 368 kr.
- Retur:** Trondheim - Oslo, Torsdag 19. okt 2006 kl. 06:45, Rute DY741 - Lavpris, 1 Voksen, 768 kr.
- Totalt å betale inkl skatter og avgifter:** 1136 kr.
- Myndighetspålagte skatter og avgifter utgjør:** 236 kr.
- Internett-gebyr:** 0 kr.

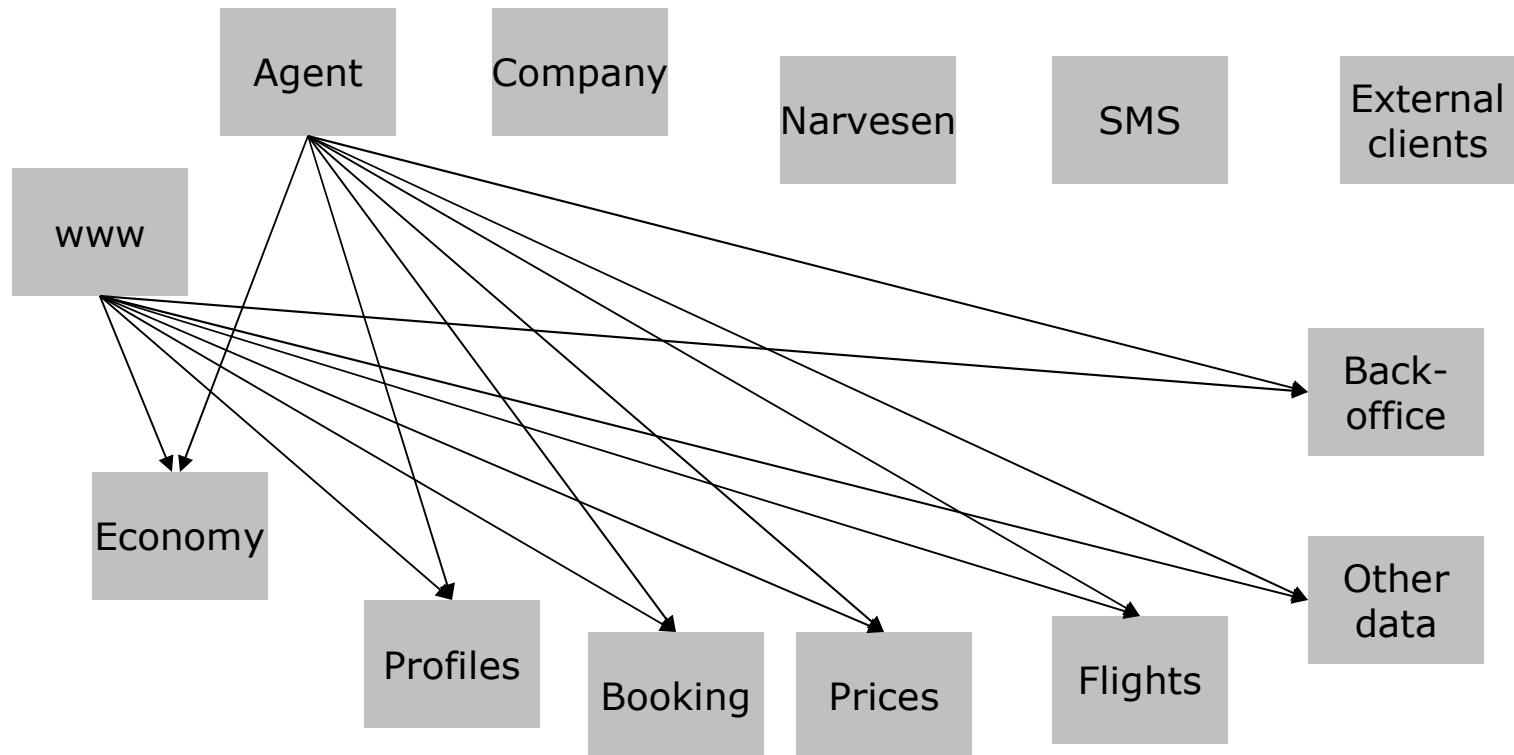

Norwegian – System description

- A system of many components

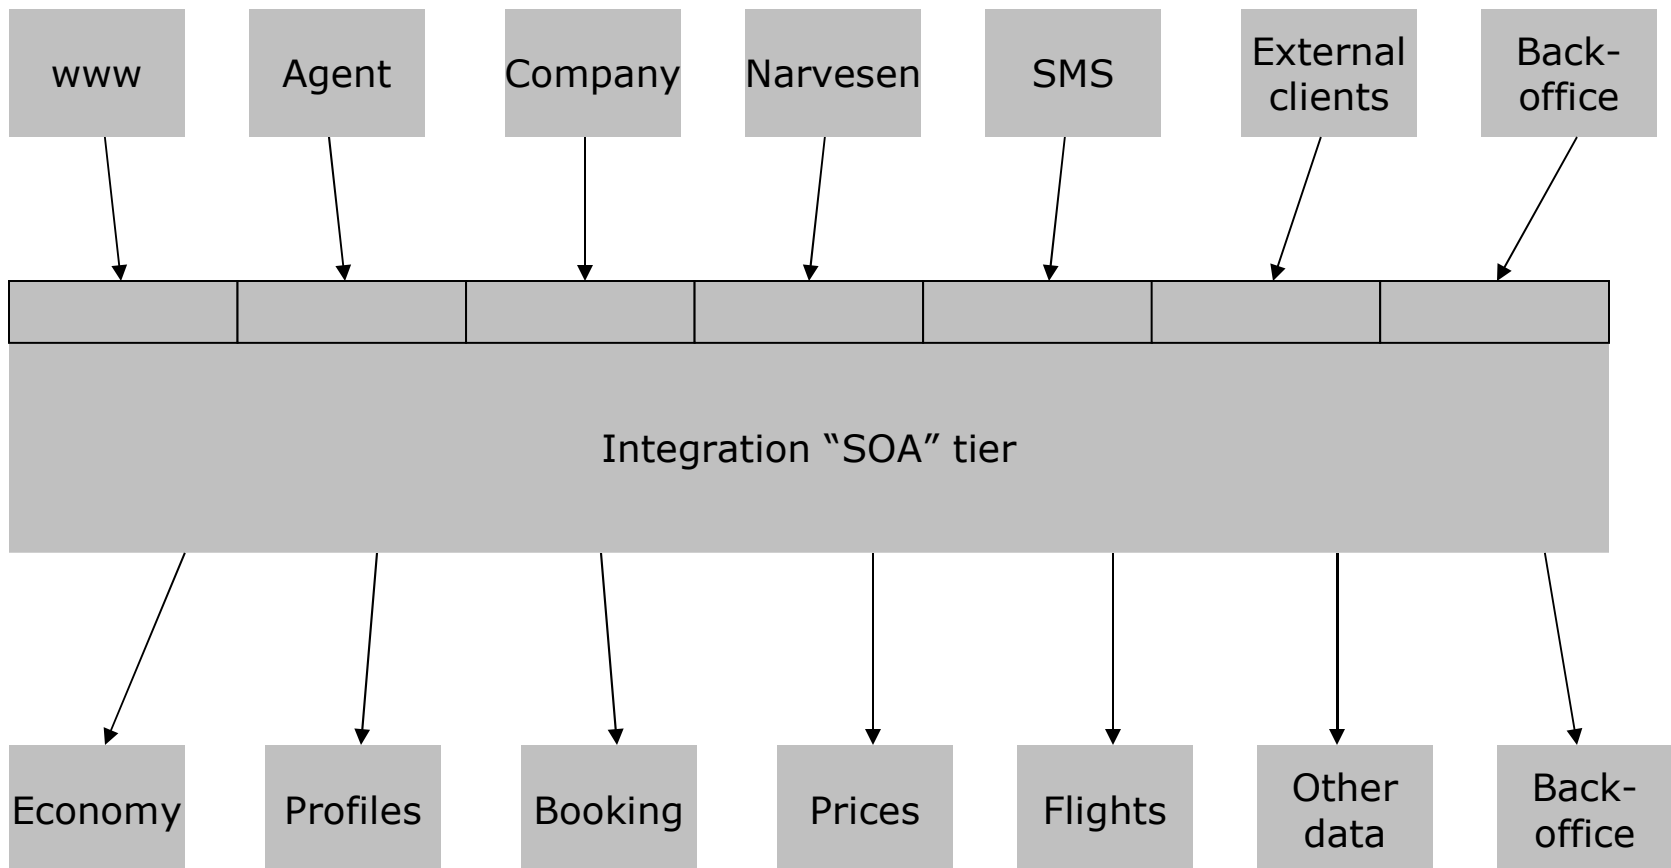

Source: Torstein Gjengedal, Bekk

Norwegian – Technical solution

Source: Torstein Gjengedal, Bekk

Norwegian – Technical solution

Source: Torstein Gjengedal, Bekk

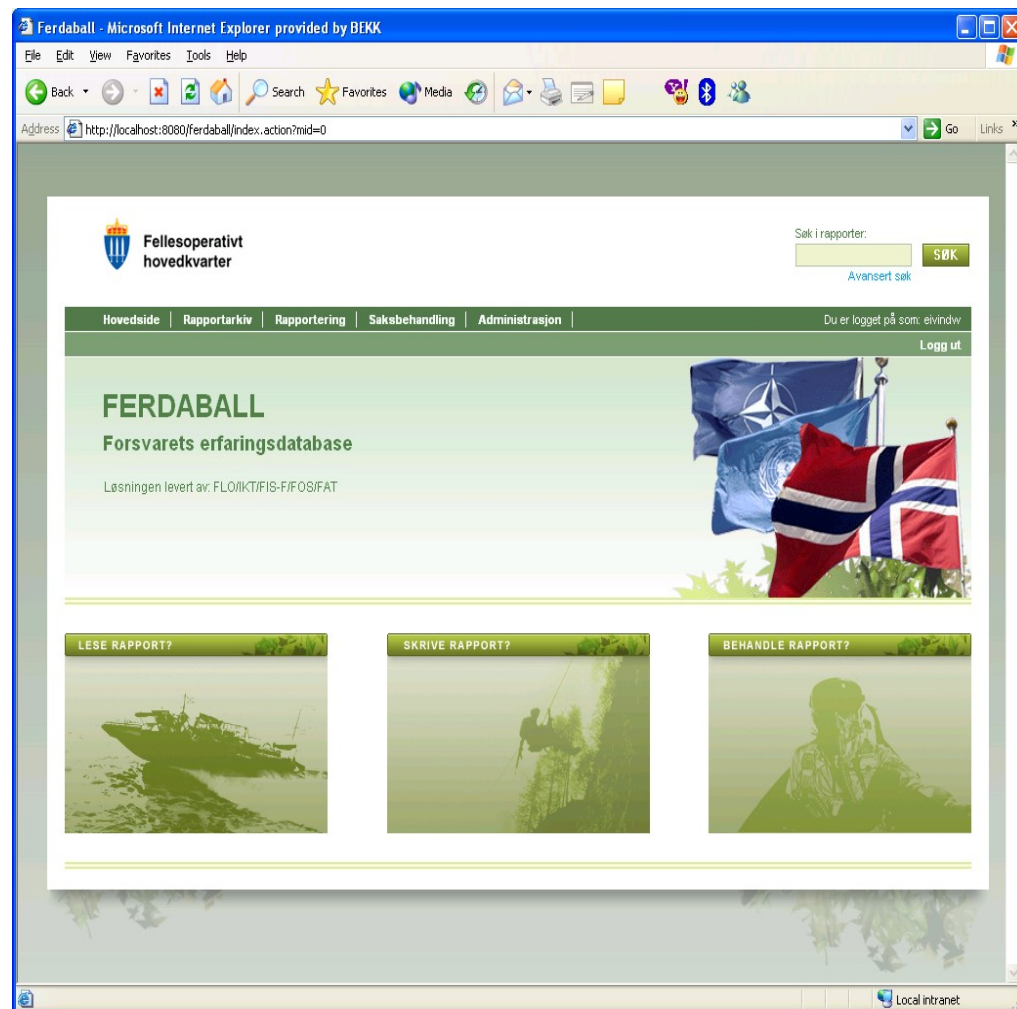

Norwegian – Technical overview

- Clients + services implemented in .NET og Java
- Integration tier – J2EE/JBoss
- Linux servers + development platform
- Interface – WebServices
 - Apache Axis
 - → WS Annotations (JEE 5)
- Service tier – EJB
 - EJB 2.x
 - → EJB 3
- High load
 - 500 000 + requests pr. day
 - Max → ~50 requests pr. second

Source: Torstein Gjengedal, Bekk

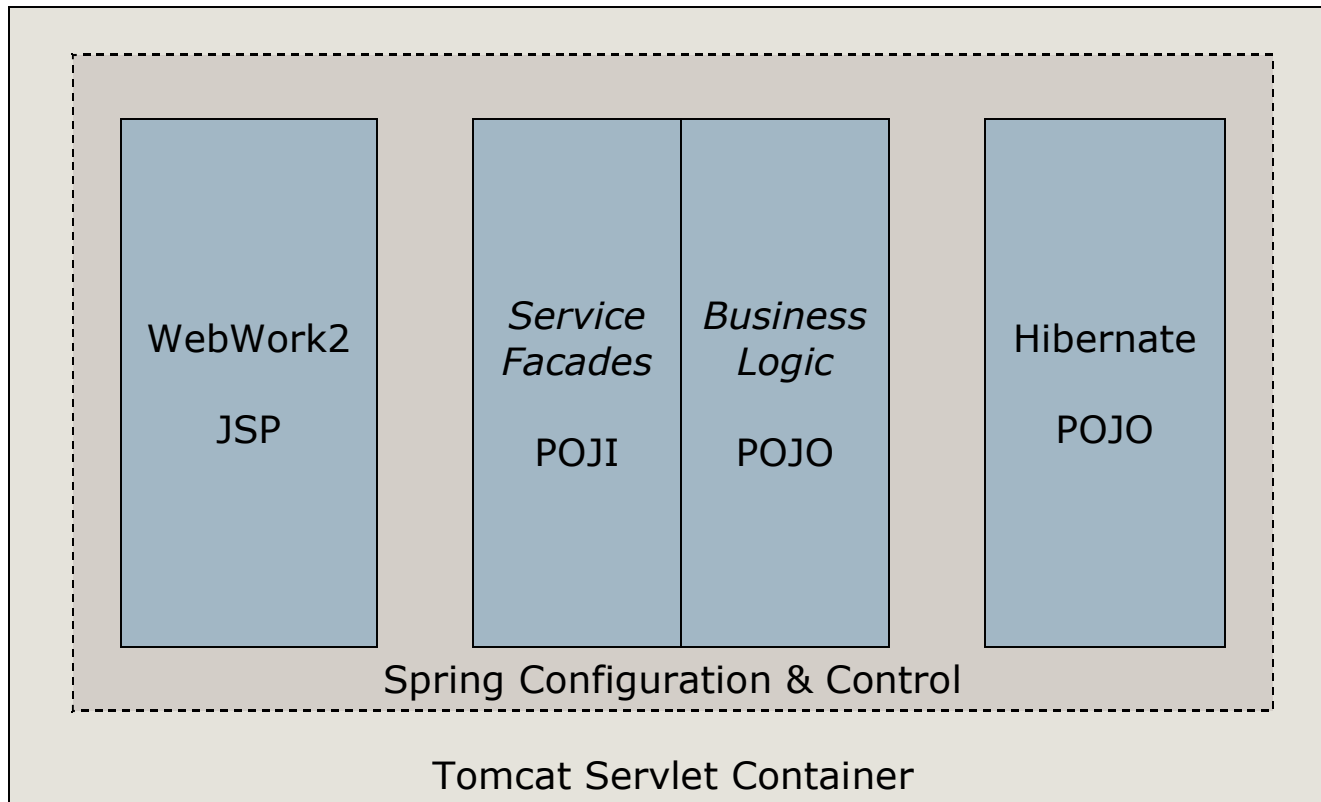

Forsvaret – Ferdaball

- Lessons learned database
- Test project
- Pure OSS implementation
- Goals
 - Save money
 - Time to market
 - Better quality
 - Counter-commercial

Ferdaball – architecture

- Spring, Hibernate, WebWork

Ferdaball – other OSS used

- SiteMesh
- Axis
- Log4J
- XDoclet/Middlegen
- Lucene
- JMock
- Jakarta Commons
- Velocity
- OpenOffice
- Tomcat (+ JBoss)
- MySQL
- Linux

Gjensidige

- KAP – internal CRM-plugin
- Technology
 - Spring
 - WebWork
 - Displaytag
 - Maven2
 - Subversion
 - JavaScript/AJAX – Prototype/Scriptaculous
 - WebSphere AS
 - TCRM database/backend

BOSS

- <http://boss.bekk.no>
- OSS contributions from BEKK
- Project examples
 - **CubicTest**
 - NoCommons
 - FunFX
 - **Struts2 Portlet**
 - Maven2 Plugins
- Master thesis possibilities

CubicTest

- TDD for GUI-testing
 - Eclipse
 - Selenium
 - Watir
- Master thesis NTNU
 - 2005 (AutAT), 2006 (3 different)
- Open Source project on BOSS
- OpenQA 2008
- Demo
 - Eclipse with CubicTest perspective
 - Run test from Eclipse
 - Run test from Maven2

Struts2 Portlet Plugin

- Java Portal
 - One page – multiple applications
 - JSR-168 – standard for portlets
- Replace dispatcher with PortletDispatcher
- portlet.xml instead of web.xml
- Run standard application as portlet
- Pros
 - Testability
 - Develop in Jetty/Pluto
 - Portal/Server independence

.NET and the others...

■ .NET

- Open Source big hit!
- IronRuby & IronPython
- CC.NET, NAnt, NUnit & NMock
- Castle, Spring.NET & NHibernate
- Mono & Moonlight

■ Ruby

- Growing market!
- Everything OSS?
- RoR, RSpec, Watir

■ JavaScript

- Prototype, script.aculo.us, ExtJS
