The compulsory projects in MAT3100, spring 2026

January 15, 2026

This is information on the compulsory projects:

- There are 2 compulsory projects, see separate links (where deadline is also indicated).
- The projects are compulsory for taking the final exam in June.
- Bad news: Both projects must be approved.
- *Good news: Every project that is delivered (in time, with name) is approved, even if it is blank otherwise!*
- Of course, I encourage you to work well on the project. You will learn more, and you will also get written comments from me on your solution/-text.
- Again: You MUST deliver in the system to get the project approved. (This is for registration purposes).
