

Optional afternoon clinical practice at Department of Gynecology, Ullevål

Students who attend mandatory gynecological clinics at Ullevål from 8.45-11.30 are welcome to continue in the clinic during the afternoon (12.00-15.00).

The alternatives for clinical practice in the afternoon are:

1. Outpatient clinic for patient referred for acute gynecological or obstetric conditions (Fødegyn-mottaket)
2. Gynecological and/obstetric surgery

Furthermore students, on request, are welcome to participate at the gynecological outpatient clinics Thursdays and Fridays from 08.30 – 12.00.

In case you want to participate in any of these activities, please let us know in advance by signing up and returning the form you receive by email the week before your scheduled clinical practice at Department of Gynecology commence. We will then plan for your participation by informing the actual doctors and nurses, and you will receive information Monday morning when you arrive regarding where the actual activities take place.

On behalf of Department of Gynecology,

Marit Lieng

Head of Department of Gynecology OUS/Professor UiO
