Welcome to Sex og samfunn!

We would like to welcome you to Sex og Samfunn for your gyn outpatient clinic. At Sex og Samfunn we welcome people of all genders and sexuality. Our slogan is “freedom from shame, freedom to choose”, and it is important for us that our clinic is a place where everyone can feel safe. When you arrive here, we will have you all change into a uniform top (you will need to wear your own pants). Depending on when you arrive, we will try to give you a tour around the clinic and a small introduction before the first patients arrive. You will be assigned to a doctor or nurse, and halfway through the practice, you will swap places with another student. This way we hope to show you as much of our practice as possible. All our patients are young (under age 25), and for some it will be the first time they come in for a gynecological exam. Therefore, the practice will be mostly observational, but we will let you participate in whatever we can. If for some reason you will be late, please call Ellen 95041253, Siri 41272970 or Trine 40453106.

Please note that you are required to watch these videos beforehand (approx. 25 minutes combined):
