**Case meeting**

You will work with a fellow student to present an interesting patient at a case meeting attended by your peers and a clinical teacher. This is a great opportunity to learn and to practice your clinical presentation skills.

You can find the time and location of your case meeting under *My Studies*.

**How to Prepare for the Case Meeting**

1. Work in pairs to find a patient.

Choose a patient who is already admitted to one of the pediatric wards at Ahus, Ullevål, or Rikshospitalet. It is easiest to select a hospital where you have DIPS access, but you may choose another hospital if a doctor can provide the necessary information (laboratory results, imaging, etc.).

2. Write the pediatric patient record.

Write the record in a Word document, print it, and hand it in to the teacher responsible for the case meeting. You may either hand in one copy per student or submit one shared copy with both names. Remember to label the document with “Case meeting” and with your name/group.

3. Prepare your presentation.

Create a PowerPoint presentation or prepare the presentation using another format (e.g., whiteboard). Your presentation should include:

- Patient history
- Clinical findings
- Relevant laboratory and imaging results
- Diagnosis
- General information about the relevant disease

It is ***not*** sufficient to simply read the patient record aloud. Make the presentation engaging and allow time for questions or discussion either during or after the presentation.

Total presentation time: 15 minutes. (Use 5min 1. Case – 2. Disease – 3. Discussion)

4. Send your presentation by email.

Email the PowerPoint file to your UiO email account so you can open it on hospital computers. The clinical teacher must receive the presentation by email no later than the day before the case meeting.
