

SMid-term evaluation, autumn 2021

for all courses at ISS combined

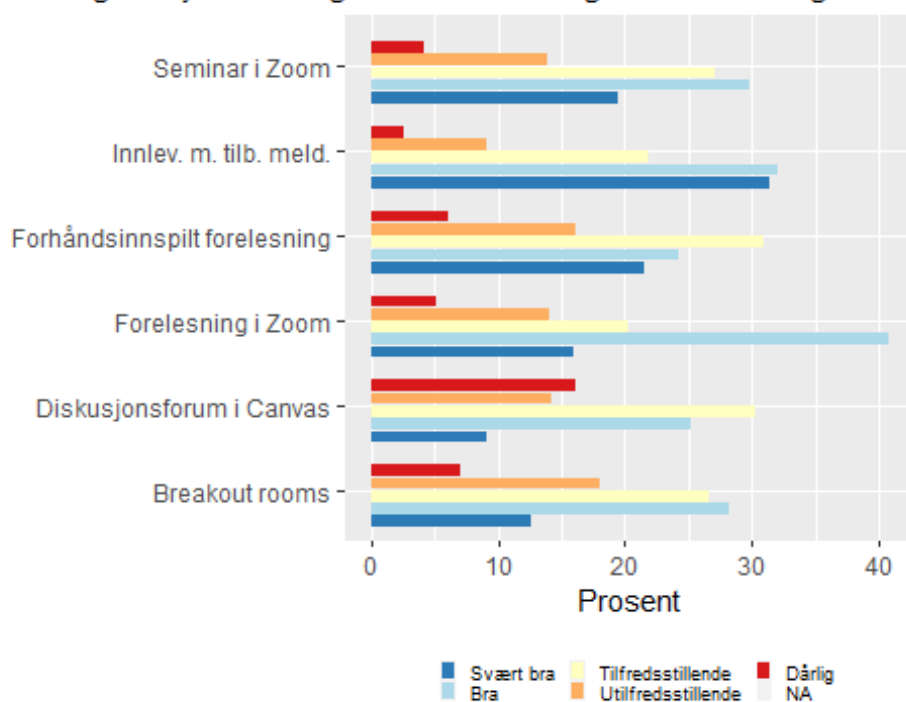

Each responsible for a course was asked to distribute a questionnaire through Canvas. The students were asked to fill out one questionnaire per course. There were 361 respondents in total, across 25 courses.

This report is across all the courses, and the one responsible for the course ("emneansvarlig") received a course-specific report which also include the qualitative responses.

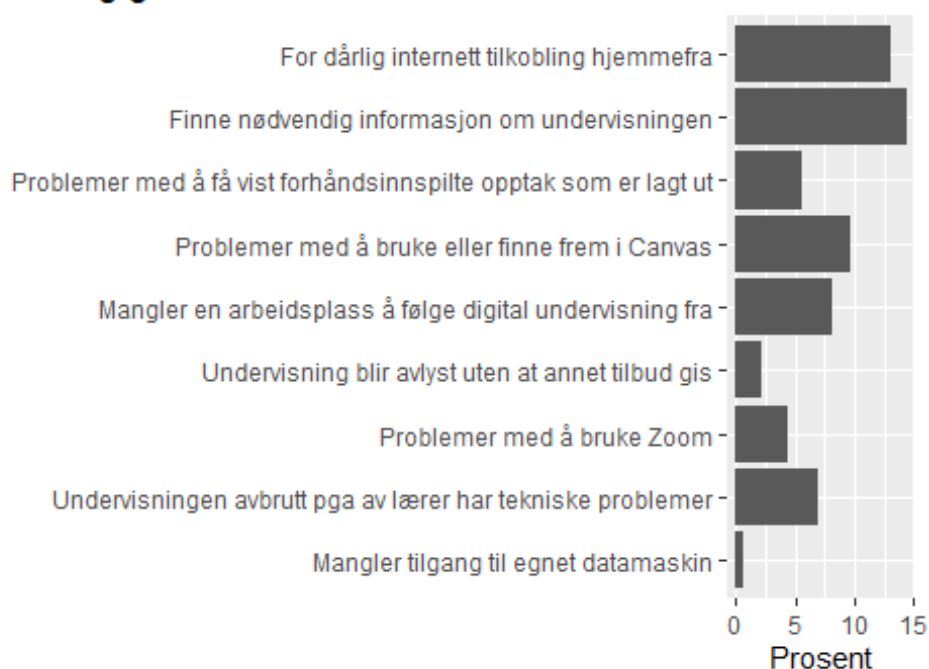

The questionnaire was made in both Norwegian and English, where the latter counted 164 responses. The results from both questionnaires have been combined in this report.
